| **Refrigerant Type** | R-290 |
| **Sections** | 1 Section |
| **Temperature Range** | 33 - 40 Degrees F |
| **Type** | Refrigerators |

## Notes & Details

Receive performance you can depend on with this Avantco 17 11/16" stainless steel solid door narrow reach-in refrigerator! Your establishment relies on refrigeration for proper food safety, whether you're storing milk, eggs, vegetables, or freshly made foods. With this reach-in refrigerator, your ingredients and fully prepared foods will stay at safe refrigerated temperatures. For optimal temperature retention, the entire cabinet is foamed-in-place using polyurethane insulation. Other helpful features include the state-of-the-art Carel iJ controller and automatic defrosting.

A corrosion-resistant stainless steel interior and exterior construction provides increased durability, keeps out moisture, and resists rust. The perforated rear plenum ensures evenly distributed airflow throughout, allowing you to load the unit with bulky items without impeding circulation. Digital temperature control allows you to easily adjust the temperature of your refrigerator's cabinet. Plus, the automatic defrost function keeps food fresh and properly chilled! The controller's audible alarms alert you to temperatures too high or too low, extended door opening, and the need to clean the unit's condenser.

This Avantco refrigerator features one solid door that offers a sleek appearance and keeps your inventory protected thanks to its ability to lock. The self-closing and stay-open solid door allows users to load the refrigerator quickly and easily after a delivery, while full-length U-shaped door handle further expedites the loading process. This unit features 3 plastic-coated steel shelves that fit in the refrigerator's versatile shelf-rail design. These slides support 33% more weight than shelf clips and can be used to hold full-size food pans (sold separately).

Designed to maintain temperatures from 33 to 40 degrees Fahrenheit, this refrigerator boasts a top-mounted 1/4 hp compressor that uses R-290 refrigerant. In addition, the top-mounted compressor is further from the floor than on a bottom-mounted unit, meaning it'll get less dirty and won't be accidentally kicked. It requires a 115V electrical connection for operation.

⚠ **WARNING:** This product can expose you to chemicals including di(2-ethylhexyl)phthalate (DEHP), which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, go to www.p65warnings.ca.gov.
