PRODUCTION PROCESS

We combine quality ingredients and our special blend of plant fats and flavouring before beginning the production process. It starts with High Moisture Extrusion (HME) to create texture, followed by cutting, cooking, and blending. The mix then undergoes shaping, is coated, fried, and pasteurized. Finally, it's blast frozen to lock in freshness, packed, and stored (below 0°F / -18°C), ready to ship to our partners.

THIS PRODUCT CONTAINS SOY AND WHEAT.
