

# Advanced Performance and Protection

Swing-Activated Safety Solutions

Now featuring proven ceramic disc technology for superior quality and performance.

A **WATTS** Brand

[bradleycorp.com](http://bradleycorp.com)

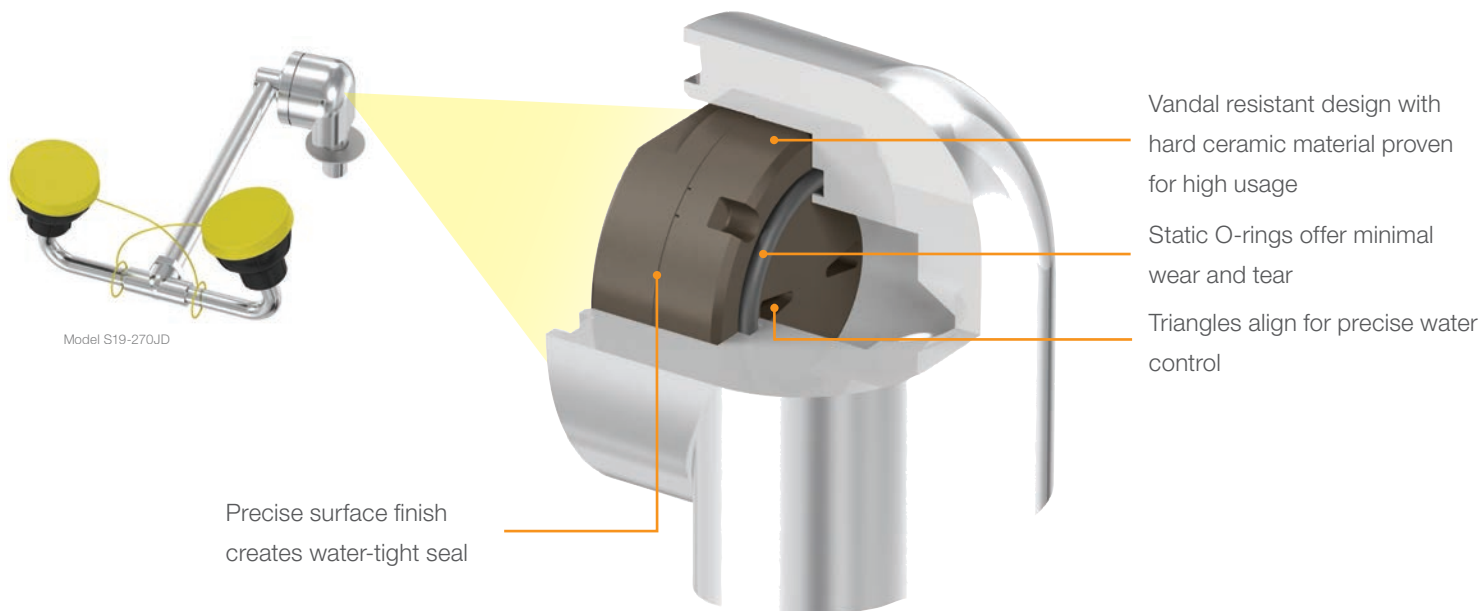

## Eye and eye/face wash solutions redesigned with a new ceramic valve.

- Extremely durable for reliable performance
- Built to last for a lifetime of activations
- Precise water control — 20° activation and deactivation reduces splashing

## Re-engineered for maximum performance

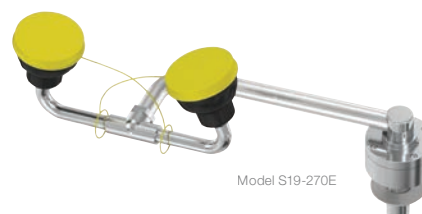

Water is controlled between two rotating ceramic discs, which fit closely together for a water-tight seal. The corrosion resistant discs provide a superior wear resistant surface for repeated valve activation.

# High performance swing-activated safety solutions you can depend on

## Swing-activated eye and eye/face wash solutions

- NEW ceramic disc technology
- Chrome plated brass pipe and fittings
- Complies with ANSI Z358.1
- Barrier-free models available
- Easy reversible right-to-left side-swing installation
- Ideal for laboratory applications
