

ULTRA-GLO®

Ceramic Infrared Strip Heaters

UGA, UGAL, UGAH, and UGAHL Series

Installation and Operating Manual

I&W #07.05.209.00

Do not operate this equipment unless you have read and understood the contents of this manual! Failure to follow the instructions contained in this manual may result in serious injury or death. This manual contains important safety information concerning the maintenance, use, and operation of this product. If you're unable to understand the contents of this manual, please bring it to the attention of your supervisor. Keep this manual in a safe location for future reference.

No opere este equipo al menos que haya leído y comprendido el contenido de este manual! Cualquier falla en el seguimiento de las instrucciones contenidas en este manual puede resultar en un serio lesión o muerte. Este manual contiene importante información sobre seguridad concerniente al mantenimiento, uso y operación de este producto. Si usted no puede entender el contenido de este manual por favor pregunte a su supervisor. Almacenar este manual en una localización segura para la referencia futura.

INTRODUCTION

Hatco Ultra-Glo® Ceramic Strip Heaters ensure maximum food holding and minimize the risk of food-borne illness. Optimum safety and quality is the result of food held at the proper serving temperatures using Ultra Glo's pre-focused heat patterns. The pre-focused heat pattern prevents foods from being over-cooked in the middle and cooling off around the edges by concentrating higher temperatures to the outer edges of holding surfaces where heat loss is the greatest. Utilizing specially designed reflectors to direct the heat from the element, Ultra-Glo Ceramic Strip Heaters safely maintain peak serving temperatures longer without cooking the food beyond the point of excellence. The ceramic element heat output allows the units to be mounted at increased heights for improved working clearances.

Ultra-Glo Ceramic Strip Heaters are available from the factory with or without shatter-resistant display lights to illuminate the warming area. These bulbs have a special coating that guards against injury and food contamination in the event of breakage.

Ultra-Glo Ceramic Strip Heaters are a product of extensive research and field testing. The materials used were selected for maximum durability, attractive appearance, and optimum performance. Every unit is inspected and tested thoroughly prior to shipment.

This manual provides the installation, safety, and operating instructions for Ultra-Glo Ceramic Strip Heaters. Hatco recommends all installation, operating, and safety instructions appearing in this manual be read prior to installation or operation of the strip heaters.

Safety information that appears in this manual is identified by the following signal word panels:

WARNING

WARNING indicates a hazardous situation which, if not avoided, could result in death or serious injury.

CAUTION

CAUTION indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

NOTICE

NOTICE is used to address practices not related to personal injury.

IMPORTANT SAFETY INFORMATION

Read the following important safety information before using this equipment to avoid serious injury or death and to avoid damage to equipment or property.

WARNING

ELECTRIC SHOCK HAZARD:

- For hard-wired units, all electrical connections must be in accordance with local electrical codes and any other applicable codes. Connections should be made by a qualified, licensed electrician.
- Turn the power OFF at the fused disconnect switch/circuit breaker and allow the unit to cool before performing any maintenance or cleaning.
- DO NOT submerge or saturate with water. Unit is not waterproof. Do not operate if unit has been submerged or saturated with water.
- This unit is not “jet-proof” construction. Do not use jet-clean spray to clean this unit.
- Use only Genuine Hatco Replacement Parts when service is required. Failure to use Genuine Hatco Replacement Parts will void all warranties and may subject operators of the equipment to hazardous electrical voltage, resulting in electrical shock or burn. Genuine Hatco Replacement Parts are specified to operate safely in the environments in which they are used. Some aftermarket or generic replacement parts do not have the characteristics that will allow them to operate safely in Hatco equipment.

FIRE HAZARD:

- Do not install Ultra-Glo ceramic strip heaters above or around combustible surfaces. Discoloration or combustion could occur. Ultra-Glo ceramic strip heaters must be installed in non-combustible surroundings only.
- Do not store or use gasoline or other flammable vapors or liquids in the vicinity of this or any other appliance.

Use only light bulbs that meet or exceed National Sanitation Foundation (NSF) standards and are specifically designed for food holding areas. Breakage of light bulbs not specially coated could result in personal injury and/or food contamination.

This unit has no “user-serviceable” parts. If service is required on this unit, contact an Authorized Hatco Service Agent or contact the Hatco Service Department at 800-558-0607 or 414-671-6350; fax 800-690-2966; or International fax 414-671-3976.

CAUTION

BURN HAZARD: Some exterior surfaces on the unit will get hot. Use caution when touching these areas.

Standard and approved manufacturing oils may smoke up to 30 minutes during initial startup. This is a temporary condition. Operate unit without food product until smoke dissipates.

To ensure safe and proper operation, refer to the “Minimum Clearance Requirements” listed in the INSTALLATION section of this manual.

NOTICE

Installation of two or more separate units with less than 3” (76 mm) between housings may result in premature failure of component parts. Failure to provide proper spacing may result in heat damage to electrical components.

To prevent unit failure, do not add a decorative soffit to hide a pass-through mounted strip heater.

To prevent premature failure of components due to excessive heat, remote control enclosures must be installed outside the strip heater heat zone.

Heat damage to countertop material such as Corian® and similar products (other than stainless steel) is not covered under the Hatco warranty. Contact the manufacturer of the base material for temperature limits and application information before installing the unit.

Use non-abrasive cleaners only. Abrasive cleaners could scratch the finish of the unit, marring its appearance and making it susceptible to dirt accumulation.

MODEL DESIGNATION

Figure 1. Model Designation

MODEL DESCRIPTIONS

Hatco Ultra-Glo® Ceramic Strip Heaters keep hot foods at optimum serving temperatures longer. Foods do not dry out or become discolored; even the most delicate dishes hold that “just-prepared” look. The Ultra-Glo pre-focused heat pattern directs heat from a ceramic element to bathe the entire holding surface. The ceramic element heat output allows the units to be mounted at increased heights for improved working clearances.

Ultra-Glo Ceramic Strip Heaters are constructed with aluminum housings in widths of 18" (457 mm) to 72" (1829 mm).

Dual models allow for side-by-side mounting of two heating elements to provide a deeper holding area (dual models are constructed with a standard 3" [76 mm] or optional 6" [152 mm] spacer between heating elements).

All Ultra-Glo Ceramic Strip Heaters have several mounting options and switch locations. Optional infinite control switches, electronic infinite control switches, remote control enclosures, incandescent lighting, and halogen lighting are available.

UGA-XX: Aluminum housing, single element depth

UGAH-XX: Aluminum housing, high wattage, single element depth

UGAL-XX: Aluminum housing, incandescent lights, single element depth

UGAHL-XX: Aluminum housing, high wattage, incandescent lights, single element depth

UGA-XXD: Aluminum housing, dual element depth

UGAH-XXD: Aluminum housing, high wattage, dual element depth

UGAL-XXD: Aluminum housing, incandescent lights, dual element depth

UGAHL-XXD: Aluminum housing, high wattage, incandescent lights, dual element depth

NOTE: Incandescent and halogen lights are not available for retrofit.

* Dimension shown is standard with 3" (76 mm) spacer; when used with 6" (152 mm) spacer, add 3" (76 mm).

Figure 6. Dimensions — Dual Depth Strip Heaters

INSTALLATION

General

Use the information in this section to prepare for installation of the strip heater. Make sure to locate the specific information for the model of strip heater and type of installation.

WARNING

FIRE HAZARD: Do not install Ultra-Glo® strip heaters above or around combustible surfaces. Discoloration or combustion could occur. Ultra-Glo strip heaters must be installed in non-combustible surroundings only.

CAUTION

To ensure safe and proper operation, refer to the “Minimum Clearance Requirements” listed in the INSTALLATION section of this manual.

NOTICE

Heat damage to countertop material such as Corian® and similar products (other than stainless steel) is not covered under the Hatco warranty. Contact the manufacturer of the base material for temperature limits and application information before installing the unit.

To prevent unit failure from excessive heat, do not add a decorative soffit to hide a pass-through mounted strip heater.

NOTE: Contact the countertop manufacturer of the base material for application information and surface temperature limits before installing the unit.

1. Remove the unit from the shipping carton and remove all packing materials.
2. Remove the information packet.

NOTE: To prevent delay in obtaining warranty coverage, fill out and mail in the warranty card to Hatco.

NOTE: If unit is equipped with optional equipment, see the OPTIONS section near the back of this manual.

Dual Mounting

When mounting units side-by-side, a space not less than 3" (76 mm) must be maintained between units. Dual units ordered from the factory are shipped with a pre-assembled 3" (76 mm) or 6" (152 mm) spacer.

NOTICE

Installation of two or more separate units with less than 3" (76 mm) between housings may result in premature failure of component parts. Failure to provide proper spacing may result in heat damage to electrical components.

Under Shelf Mounting

When mounting a unit under a shelf, use adjustable angle brackets to assure proper spacing. Remote control enclosures are recommended to keep switches out of the heat zone and prevent premature failure.

Pass-Through

If pass-through area is 12" to 16" (305 to 406 mm) deep, a single unit can be used. For a 20" to 24" (508 to 610 mm) deep pass-through area, a dual unit is recommended. Installation of multiple units must have a minimum spacing of 3" (76 mm) between heaters.

Over Steam Table

When mounting over a steam table, a remote control enclosure must be installed.

INSTALLATION

Minimum Clearance Requirements

FIRE HAZARD:

- Do not install Ultra-Glo strip heaters above or around combustible surfaces. Discoloration or combustion could occur. Ultra-Glo strip heaters must be installed in non-combustible surroundings only.

Models	(A)	(B)	(C)
UGA and UGAL	14" (356 mm)	3" (76 mm)	1" (25 mm)
UGAH and UGAHL	17" (432 mm)	3" (76 mm)	1" (25 mm)

Figure 7. Clearance Requirements

Recommended Mounting Heights

Figure 8. Recommended Mounting Height for all UGA single element depth models.

Figure 9. Recommended Mounting Height for all UGA dual element depth models with a 3" (76 mm) spacer.

Figure 10. Recommended Mounting Height for all UGA dual element depth models with a 6" (152 mm) spacer.

INSTALLATION

Assembly

Ultra-Glo® Strip Heaters are shipped with most components pre-assembled. Dual units come with a required 3" (76 mm) or 6" (152 mm) spacer pre-assembled at the factory.

Optional mounting equipment and remote control enclosures must be installed on location.

Undershelf Mounting

Undershelf mounting permanently attaches the unit to the underside of a shelf. It can be mounted to a flat shelf or a shelf with rolled/flanged edges using the included adjustable angle brackets. A minimum gap of 1" (25 mm) is required between the unit and the underside of the shelf to prevent heat damage to the electrical system of the unit.

CAUTION

To ensure safe and proper operation, refer to the "Minimum Clearance Requirements" listed in the INSTALLATION section of this manual.

NOTE: When mounting the unit under a shelf, it is recommended to use a remote control enclosure.

If the shelf has a rolled or flanged edge, use the appropriate screw hole locations on the adjustable angle brackets to mount the unit below the lowest edge of the rolled or flanged shelf. The adjustable angle brackets can provide a 1" (25 mm), 1.5" (38 mm), or 2" (51 mm) gap between the unit and the underside of the shelf.

NOTICE

DO NOT conceal unit. Unit must be installed below the lowest edge of a rolled or flanged shelf. Failure to mount unit properly may result in premature failure of switches and void the product warranty.

Figure 11. Flanged Shelf Installation

Adjustable Angle Bracket Mounting

1. Position the unit on a flat surface with the heating elements facing down.
2. Remove the two middle screws from each end of the unit.
3. Align the appropriate holes on an adjustable angle bracket with the middle screw holes on one end of the unit. Secure the angle bracket using the removed middle screws.
4. Repeat step 3 for the opposite end of the unit.

Figure 12. Adjustable Angle Bracket Installation

5. Fasten the angle brackets to the underside of the shelf using appropriate fasteners (not supplied by Hatco).

NOTE: Two pairs of brackets will be needed for dual units.

Figure 13. Dual Unit Mounting

INSTALLATION

Permanent Surface Mount

Tubular stand mounting permanently attaches the unit to a countertop or serving table. All wiring may be concealed within one of the tubular stands.

CAUTION

To ensure safe and proper operation, refer to the “Minimum Clearance Requirements” listed in the INSTALLATION section of this manual.

The aluminum, non adjustable tubular stands are available in one inch (25 mm) increments from 14”–24” (356–610 mm).

NOTE: Tubular stands are not field retrofittable.

NOTE: If wiring is to be concealed, a 1” (25 mm) diameter hole must be provided in the mounting surface centered under the stand containing the wiring conduit.

Distance from end of unit to center of conduit hole.
Needed for 1” diameter hole cutout in mounting surface.

Figure 14. Countertop Conduit Hole Dimension

1. Position the unit upside-down on a flat surface.

NOTE: Units for this application are supplied with the conduit attached to one side of the unit. Conduit should not be removed.

2. If applicable, route the flexible conduit through the center of one of the stands (see Figure 15).
3. Pull the conduit-side stand up against the unit and secure the stand to the unit using the screws supplied.

4. Align the other stand with the mounting holes at the opposite end of the unit and secure the stand to the unit using the screws supplied.
5. If applicable, route the flexible conduit through the 1” diameter hole cut into the mounting surface.
6. Secure the stands to the mounting surface.

NOTE: Two pairs of stands will be needed for mounting dual units.

Figure 15. Tubular Stand Mounting

INSTALLATION

Overhead Mounting

Overhead hanger post mounting permanently attaches the unit to an overhead surface. All wiring may be concealed within one of the hanger posts.

⚠ WARNING

To ensure safe and proper operation, refer to the “Minimum Clearance Requirements” listed in the **INSTALLATION** section of this manual.

Hanger posts are available in aluminum non-adjustable lengths from 3"– 10" (76 – 254 mm).

NOTE: Hanger posts are not field retrofittable.

NOTE: If wiring is to be concealed, a 1" (25 mm) diameter hole must be provided in the mounting surface centered above the hanger post containing the wiring conduit.

1. Make sure the overhead mounting surface is secure and will allow the unit to be suspended at a level, safe, and proper distance from walls, counter, and food.
2. Position the unit on a flat surface with the heating elements facing down.

NOTE: Units for this application are supplied with the conduit attached to one side of the unit. Conduit should not be removed.

3. If applicable, route the flexible conduit through the center of one of the hanger posts (see Figure 16).
4. Pull the conduit-side hanger post down onto the unit and secure the post to the unit using the screws supplied.
5. Align the other hanger post with the mounting holes at the opposite end of the unit and secure the post to the unit using the screws supplied.
6. If applicable, route the flexible conduit through the 1" diameter hole cut into the mounting surface.
7. Carefully lift the unit and secure the hanger posts to the overhead mounting surface.

NOTE: Two pairs of hanger posts will be needed for mounting dual units.

Figure 16. Hanger Post Mounting

Electrical Wiring Hook-Up

Refer to the **ELECTRICAL RATING CHARTS** for unit specific information.

⚠ WARNING

ELECTRIC SHOCK HAZARD: For hard-wired units, all electrical connections must be in accordance with local electrical codes and any other applicable codes. Connections should be made by a qualified, licensed electrician.

NOTE: If the unit being installed is not shown or listed in this manual, refer to the wiring diagram supplied with the unit and the installation information on the unit for further instructions.

INSTALLATION

Power Supply

Install supply wire and connectors suitable for at least 90°C (194°F).

- Use a minimum of No. 14 AWG copper wire for individual circuits up to 15 amps.
- Use a minimum of No. 12 AWG copper wire for individual circuits 15 to 20 amps.
- Use a minimum of No. 10 AWG copper wire for individual circuits 20 to 25 amps.

NOTE: Refer to the wiring diagram supplied with the unit and specifications label attached to the unit for specific electrical information.

Conduit Connection

Units supplied with a right angle fitting and flexible conduit attached have had all internal connections completed at the factory. Attach the proper power supply leads to the high temperature lead wires in the conduit.

Figure 17. Conduit

NOTE: Refer to the wiring diagram supplied with the unit and specifications label attached to the unit for specific electrical information.

Remote Control Enclosures

Hatco Remote Control Enclosures (RMBs) include switches, wire leads, and/or indicator lights and are ready for installation. Proper use of RMBs require one RMB per strip heater.

NOTICE

To prevent premature failure of components due to excessive heat, remote control enclosures must be installed outside the strip heater heat zone.

Control Switches

When two or more units are mounted where the heat from one housing tends to raise the temperature of another, the control switches should be installed in a remote control enclosure. Units in a multiple installation should use remote control enclosures.

NOTE: Remote control enclosures are available in several sizes. All models are built in accordance with UL standards to accommodate switches, indicator lights, and wiring, ready for installation. See the OPTIONS section near the back of this manual.

OPERATION

General

Use the following information to operate the Ultra-Glo® Strip Heaters.

WARNING

Read all safety messages in the IMPORTANT SAFETY INFORMATION section before operating this equipment.

CAUTION

Standard and approved manufacturing oils may smoke up to 30 minutes during initial startup. This is a temporary condition. Operate unit without food product until smoke dissipates.

Heating Element(s)

Heating element(s) are controlled either by an ON/OFF toggle switch(es) or an optional infinite control(s). To turn each element on, move the ON/OFF toggle switch to the ON position or turn the infinite control to the desired setting. If the unit is equipped with an indicator light(s), the light(s) will illuminate when the element is turned on.

Allow 15-20 minutes to reach operating temperature.

CAUTION

BURN HAZARD: Some exterior surfaces on the unit will get hot. Use caution when touching these areas.

NOTE: Units with factory attached control boxes cannot be equipped with infinite switches.

Lights

On models equipped with display lights, move the light ON/OFF toggle switch to the ON position to turn on the lights.

Figure 18. Controls

MAINTENANCE

General

Hatco Ultra-Glo® Strip Heaters are designed for maximum durability and performance with minimum maintenance.

WARNING

ELECTRIC SHOCK HAZARD:

- Unplug the power cord or turn the power OFF at the fused disconnect switch/circuit breaker and allow the unit to cool before performing any maintenance or cleaning.
- DO NOT submerge or saturate with water. Unit is not waterproof. Do not operate if unit has been submerged or saturated with water.

This unit has no “user-serviceable” parts. If service is required on this unit, contact an Authorized Hatco Service Agent or contact the Hatco Service Department at 800-558-0607 or 414-671-6350; fax 800-690-2966; or International fax 414-671-3976.

NOTICE

Use non-abrasive cleaners only. Abrasive cleaners could scratch the finish of the unit, marring its appearance and making it susceptible to dirt accumulation.

Cleaning

To preserve the finish of the strip heater, it is recommended that the surfaces be wiped daily with a clean, soft, damp cloth. Stubborn stains may be removed with a good stainless steel cleaner or a non-abrasive cleaner. Hard to reach areas should be cleaned with a small brush and mild soap.

Replacing Display Light Bulbs

WARNING

Use only light bulbs that meet or exceed National Sanitation Foundation (NSF) standards and are specifically designed for food holding areas. Breakage of light bulbs not specially coated could result in personal injury and/or food contamination.

The display light is either an incandescent bulb or halogen bulb that illuminates the warming area. This bulb has a special coating to guard against injury and food contamination in the event of breakage.

To replace a bulb, disconnect the power supply and wait until the unit has cooled. Display lamps have a threaded base. Unscrew the bulb from the unit and replace it with a new specially coated incandescent bulb. Hatco shatter-resistant bulbs meet NSF standards for food holding and display areas.

NOTE: Hatco shatter-resistant light bulbs meet NSF standards for food holding and display areas. For 120, 120/208, and 120/240 volt units use the following Hatco part numbers:

Incandescent Bulb = 02.30.043.00

Halogen Bulb = 02.30.081.00

For 240V export units use:

Incandescent Bulb = 02.30.058.00

WARNING

ELECTRIC SHOCK HAZARD: Use only Genuine Hatco Replacement Parts when service is required. Failure to use Genuine Hatco Replacement Parts will void all warranties and may subject operators of the equipment to hazardous electrical voltage, resulting in electrical shock or burn. Genuine Hatco Replacement Parts are specified to operate safely in the environments in which they are used. Some aftermarket or generic replacement parts do not have the characteristics that will allow them to operate safely in Hatco equipment.

TROUBLESHOOTING GUIDE

WARNING

This unit must be serviced by qualified personnel only. Service by unqualified personnel may lead to electric shock or burn.

WARNING

ELECTRIC SHOCK HAZARD: Turn the power switch OFF, unplug the power cord, and allow the unit to cool before performing any maintenance or cleaning.

Symptom	Probable Cause	Corrective Action
Unit is turned "ON" but there is no heat.	No power to unit.	Check circuit breaker and reset as necessary.
	Switch is defective.	Contact Authorized Service Agent or Hatco for assistance.
	Wiring is open.	Contact Authorized Service Agent or Hatco for assistance.
	Heating element defective.	Contact Authorized Service Agent or Hatco for assistance.
Heat is inadequate.	Unit mounted too high above target area.	Lower unit, putting effective heat closer to target.
	Excessive air movement around strip heater target area.	Restrict or redirect air movement (air conditioning duct or exhaust fan) away from unit.
	Incorrect power supply (low).	Check power supply to unit, making sure it matches rating on the unit. If power supply is incorrect, change to match rating on unit.
Heat is excessive.	Unit mounted too close to target area.	Check to see that installation is within specifications for type/model. Increase mounting height if too close.
	Voltage supply too high.	Check power supply to unit, making sure it matches rating on unit. If power supply is incorrect, change to match rating.
Control switches burn-out rapidly.	Switches are mounted in the heat zone.	Check switch location per Hatco guidelines in the Installation and Operations Manual. Relocate switches to a cooler zone if installation is incorrect.
	Switches used are not Hatco supplied.	Genuine Hatco Parts are specified to operate safely and properly in the environment in which they are used. Contact Authorized Service Agent or Hatco to replace switches with Genuine Hatco Replacement Parts.

OPTIONS

Remote Control Enclosures

Hatco remote control enclosures (RMBs) come in various sizes and configurations for use with the strip heaters. RMBs locate controls away from the constant heat of the unit, increasing the life span of the controls. All models are built in accordance with UL standards to accommodate controls, indicator lights, and wiring.

Figure 19. RMB (RMB-14 Series Shown)

NOTICE

To prevent premature failure of components due to excessive heat, remote control enclosures must be installed outside the strip heater heat zone.

NOTE: Proper use of remote control enclosures requires one RMB per strip heater.

Models	Width (A)	Depth (B)	Height (C)	Width (D)
RMB-3 Series	5-1/2" (140 mm)	3" (76 mm)	2-1/2" (64 mm)	7" (178 mm)
RMB-7 Series	9" (229 mm)	3" (76 mm)	2-1/2" (64 mm)	10-1/2" (267 mm)
RMB-14 Series	14" (356 mm)	3" (76 mm)	2-1/2" (64 mm)	15-1/2" (394 mm)
RMB-16 Series	16" (406 mm)	3" (76 mm)	2-1/2" (64 mm)	17-1/2" (445 mm)
RMB-20 Series	20" (508 mm)	3" (76 mm)	2-1/2" (64 mm)	21-1/2" (546 mm)
RMB-22 Series	22" (559 mm)	3" (76 mm)	2-1/2" (64 mm)	23-1/2" (597 mm)
RMB-24 Series	24" (610 mm)	3" (76 mm)	2-1/2" (64 mm)	25-1/2" (648 mm)

Figure 20. Dimensions — RMBs

Display Lights

Strip heaters may be equipped from the factory with incandescent display lights or halogen display lights to illuminate the warming area.

Hatco shatter-resistant bulbs guard against injury and food contamination in the event of breakage. The display lighting meets National Sanitation Foundation (NSF) standards for food holding and display areas.

Figure 21. Display Lights

NOTE: Display lights cannot be retrofitted to units.

HATCO LIMITED WARRANTY

1. PRODUCT WARRANTY

Hatco warrants the products that it manufactures (the "Products") to be free from defects in materials and workmanship, under normal use and service, for a period of one (1) year from the date of purchase when installed and maintained in accordance with Hatco's written instructions or 18 months from the date of shipment from Hatco. Buyer must establish the Product's purchase date by returning Hatco's Warranty Registration Card or by other means satisfactory to Hatco in its sole discretion.

Hatco warrants the following Product components to be free from defects in materials and workmanship from the date of purchase (subject to the foregoing conditions) for the period(s) of time and on the conditions listed below:

- a) **One (1) Year Parts and Labor PLUS One (1) Additional Year Parts-Only Warranty:**
Conveyor Toaster Elements (metal sheathed)
Drawer Warmer Elements (metal sheathed)
Drawer Warmer Drawer Rollers and Slides
Food Warmer Elements (metal sheathed)
Display Warmer Elements (metal sheathed air heating)
Holding Cabinet Elements (metal sheathed air heating)
Built-In Heated Well Elements
(metal sheathed)
- b) **One (1) Year Parts and Labor PLUS Four (4) Years Parts-Only Warranty on pro-rated terms that Hatco will explain at Buyer's request:**
3CS and FR Tanks
- c) **One (1) Year Parts and Labor PLUS Nine (9) Years Parts-Only Warranty on:**
Electric Booster Heater Tanks
Gas Booster Heater Tanks

THE FOREGOING WARRANTIES ARE EXCLUSIVE AND IN LIEU OF ANY OTHER WARRANTY, EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR PATENT OR OTHER INTELLECTUAL PROPERTY RIGHT INFRINGEMENT. Without limiting the generality of the foregoing, SUCH WARRANTIES DO NOT COVER: Coated incandescent light bulbs, fluorescent lights, decorative heat lamp bulbs, coated halogen light bulbs, halogen heat lamp bulbs, heated glass shelves, glass components, Product failure in booster tank, fin tube heat exchanger, or other water heating equipment caused by liming, sediment buildup, chemical attack or freezing, Product misuse, tampering or misapplication, improper installation, or application of improper voltage.

2. LIMITATION OF REMEDIES AND DAMAGES

Hatco's liability and Buyer's exclusive remedy hereunder will be limited solely, at Hatco's option, to repair or replacement by a Hatco-authorized service agency (other than where Buyer is located outside of the United States, Canada, United Kingdom or Australia in which case Hatco's liability and Buyer's exclusive remedy hereunder will be limited solely to replacement of part under warranty) with respect to any claim made within the applicable warranty period referred to above. Hatco reserves the right to accept or reject any such claim in whole or in part. Hatco will not accept the return of any Product without prior written approval from Hatco, and all such approved returns shall be made at Buyer's sole expense. HATCO WILL NOT BE LIABLE, UNDER ANY CIRCUMSTANCES, FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES, INCLUDING BUT NOT LIMITED TO LABOR COSTS OR LOST PROFITS RESULTING FROM THE USE OF OR INABILITY TO USE THE PRODUCTS OR FROM THE PRODUCTS BEING INCORPORATED IN OR BECOMING A COMPONENT OF ANY OTHER PRODUCT OR GOODS.
