

NOBLE CHEMICAL ACTIFOAM FOAMING ACID CLEANSER

FOR USE ON:

Sinks
Shower stalls
Toilets
Tile and grout floors
Swimming pools
Kitchens
Walls
Countertops
Stainless steel
Chrome fixtures
Fountains

DESCRIPTION:

Actifoam is a fast acting acid-type cleaner that is high foaming for increased contact with vertical surfaces such as shower walls. This tough formula quickly and effectively removes oil, heavy soil, mineral deposits, scale, urinary salts, soap film, and more, while leaving a fresh wintergreen scent.

DIRECTIONS:

Application of this product while foaming yields the greatest results and increased contact time. Cold water works very well with this product, and warm water may be used for greater chemical action. Following the ratios below, foam the product onto surfaces to be cleaned, and then allow the foam to react and penetrate / loosen soil. Brush the surface and rinse well. Always rinse thoroughly after use.

LIGHT DUTY: 1 part Actifoam to 35 parts water (also to be used on terrazzo surfaces)

MEDIUM DUTY: 1 part Actifoam to 25 parts water

HEAVY DUTY: 1 part Actifoam to 15 parts water

EXTRA HEAVY DUTY: 1 part Actifoam to 5 - 10 parts water

Note: this product is not recommended for use on marble.
