BIG STIK® IMMERSION BLENDER COUPLING/SHAFT REPLACEMENT FAQ

BIG STIK®
EVOLUTIONX
WARING®

1. **Q:** Can my existing Big Stik® shafts be used with the new EvolutionX® power pack?
A: Yes! BUT to retro fit your existing shafts (WSB50ST-70ST) with the new EvolutionX® power pack (WSBPPX), you must use the coupling replacement kit (CAC206), replace the old coupling with the new blue coupling and you're off!
NOTE: The existing Big Stik® shafts will NOT fit on the new EvolutionX® power pack (WSBPPX) unless you change out the coupling.
2. **Q:** Can I convert new shafts from the Big Stik® EvolutionX® series to work with my existing WSB50 Series Big Stik® Power pack?
A: No. We do not recommend this.
3. **Q:** How can I tell the difference between the original Big Stik® and the new EvolutionX® shafts?
A: Inspect the coupling at the top of the shaft. A black coupling indicates an original Big Stik® shaft and a blue coupling indicates a new EvolutionX® shaft.
4. **Q:** Is the shaft interchangeable with other sizes and detachable for cleaning?
A: Yes! The EvolutionX® features 5 different interchangeable shaft sizes plus a whisk attachment. Shafts are also detachable for easy cleaning.
5. **Q:** Are the EvolutionX® shafts dishwasher safe?
A: Yes, all shafts are fully-sealed and dishwasher safe.
6. **Q:** What improvements do the new shafts have?
A: The new EvolutionX® shafts feature a stronger, more robust, and more durable coupling to match the new, more powerful EvolutionX® power pack.
