Exceptional Contaminant Relief

Pedestal | Wall Mounted | Swing Activated | Recessed Cabinet
Concealed Cabinet | Heat Trace Combination Units
Combination Drench Showers | Enclosed Safety Showers

bradleycorp.com

A **WATTS** Brand

In an emergency you want the best and fastest contaminant relief available. Halo™ eye and eye/face washes are designed with the latest and most advanced technology in fluid dynamics. This technology provides unrivaled facial coverage and a superior wash pattern. In a hazardous environment, Halo is the best protection you can provide.

85% Facial Coverage

That's 20% more protection than other eye/face washes!

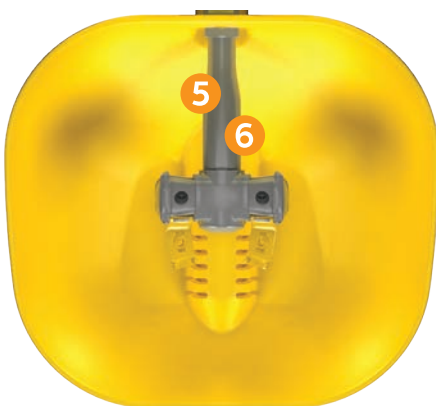

The most effective wash-down protection for emergency eye and face relief

Emergency eye wash units are classic fixtures that originated during safety's early days. These fixtures evolved from the basic eyewash model with little to no options, to the fixtures of today. Bradley's comprehensive product offering includes options for high-visibility Bradtect yellow, stainless steel for corrosive environments, or heat trace for freeze protection. Our wide array of options ensures there is an eyewash or combination eyewash/drench shower for every application.

Key Features

- 1 Enhanced dust cover protects bowl and spray heads to keep them clean and ready for emergency situations
- 2 Universal, single-step, ergonomic hand activation paddle
- 3 Separate supply and waste pipes prevent cross-contamination
- 4 Large, contoured bowl design funnels water into drain and keeps water contained
- 5 Self-draining Aquaduct™ removes standing water away from the spray head, and reduces bacterial growth when not in use
- 6 Integral stainer reduces debris and prevents clogging
- 7 Dust cover caps are hinged for a secure hold
