

Casters (optional)

1. Lay the unit down and loosen the base screw (please pay attention to the protection of the product when placing it down).

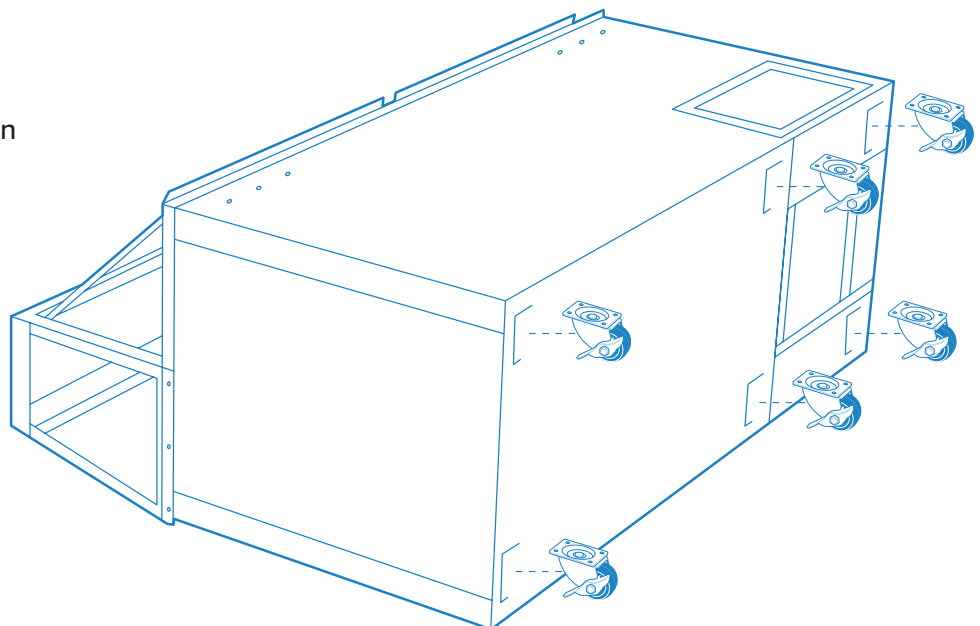

Note: It will take more than one person to lay the unit down carefully.

2. Remove the base.

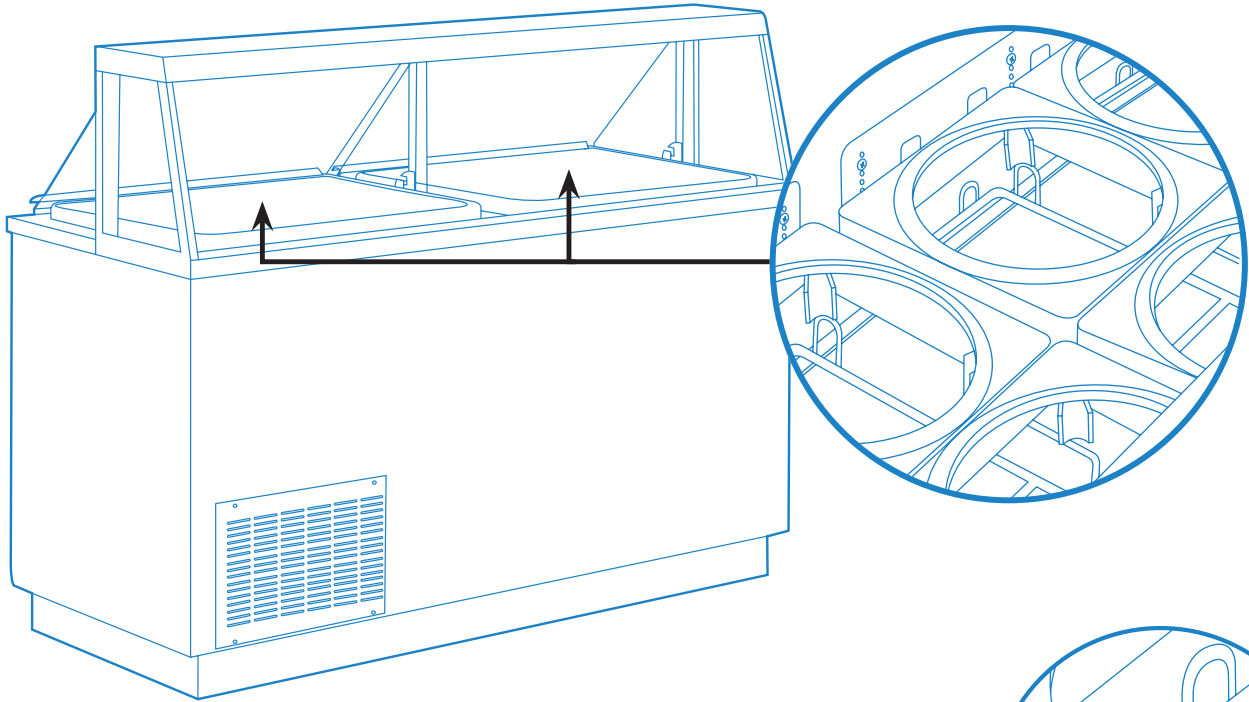

3. Install the casters.

Note: After adding the casters, allow the unit to sit upright for 24 hours before plugging into an electrical outlet.

Tub Inserts and Covers

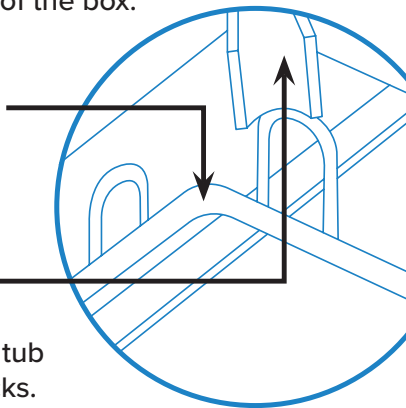

1. Unpack all the parts of your unit.
Note: The glass sneeze guard parts will require two people to lift out of the box.

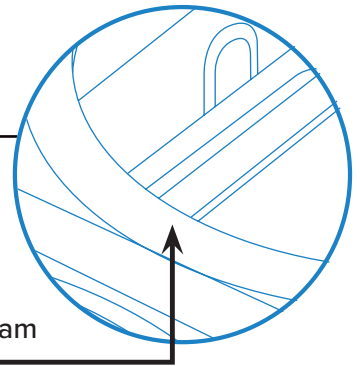

2. Place the wire tub racks inside the unit.

3. Slide the tub grips into the corners of the bottom of the tub holders.

4. Place your ice cream tub on top of the wire racks.

5. Place the plastic tub holder on top of the ice cream container to secure the ice cream tub in place.

6. Securely place the wall supports between the tub and the wall.

Note: The wall supports will lock the tub into place.

7. Repeat steps 4-6 for all ice cream tubs.

8. Once all your ice cream tubs are loaded in the case, shut the glass to keep the unit at the proper temperature.
