

How to Use

Use in place of your everyday dish soap. Scrape off (and hopefully compost) excess food. No pre-soak needed. Hello water savings!** •
Spray directly onto dirty dishes until covered and foamy.

- For lightly soiled dishes: just rinse with water.
- For heavily soiled dishes: let the foam work its magic for a few minutes. Then wipe and rinse.

**When used as instructed, compared to traditional hand dish wash methods. NOT FOR USE IN AUTOMATIC DISHWASHERS.
