

How to Use

This dishwasher detergent has been formulated to work with your automatic dishwasher. Please follow instructions to get the most effective dishwashing experience.

LOAD DISHWASHER: Make sure items are dishwasher safe. Silver, aluminum and stainless steel should be washed in separate loads to avoid discoloration. Load items with soiled surfaces facing the center of the bottom rack for optimum dishwashing.

ADD DISHWASHER DETERGENT: Fill main dispenser cup according to machine directions and close dispenser door. Close package after use and store in a dry place out of reach of children.

For very hard water we recommend using Seventh Generation Rinse Aid.
