SimpliStock™
peg

An innovative solution to keeping products
front and center to boost sales –

**SimpliStock™ Peg Center Store modular pusher display
systems from Retail Space Solutions.**

SimpliStock™ Peg shelf pusher systems keep products front-faced and uncluttered, creating an intuitive shopping experience. The lightweight, durable tray adjusts to fit any size product. The tall, curved, clear lens secures packages stay in place while molded-in clips accommodate both vertical & horizontal price tags, which remain protected behind the lens. The innovative tray with center pusher paddle replaces traditional peg hooks, keeping products moving forward smoothly while eliminating the possibility of bags twisting or tearing. All resulting in **easy-to-shop displays** and **boosting sales**.

SimpliStock™ Peg Center Store pusher systems:

- Adjust to fit packages 3.6" to 7.5" wide
- Reduce time needed from staff to tidy peg displays
- Work with existing infrastructure

Center Store pusher systems are simple to install and **create orderly – and effective – product displays.**

SAVE
on labor costs

LIFT
in-store sales

IMPROVED
product presentation

INCREASED
facings

REDUCED
conditioning

BETTER
shopper experience

Effortless installation and versatile design

SwiftHook™ securely attaches to gondola

Installation of the patent-pending SwiftHook™ is intuitive and secure. Metal hook attaches easily to existing pegboards or slatwalls and allows for simple repositioning during planogram changes.

Front-facing products create new store feel every day

Pusher seamlessly glides products forward to ensure constant visibility and organization, keeping them neat. No twisting or ripped peg holes in bags.

Increased product facings

Lightweight, sturdy tray allows products to sit above the gondola, creating an additional row of facings at the top.

Upward pull makes reaching for low products easier

With SimpliStock™ installed, customers can grab products by simply pulling them upward – without having to bend down far to reach them.

Adjustable width tray accommodates various package sizes

Width of flexible tray adjusts smoothly and easily by hand. Two sizes – narrow and wide – accommodate the majority of standard goods.
