

Care

INSTRUCTIONS

CARE INSTRUCTIONS FOR PORCELAIN

- Select a low temperature programme for a mild wash.
- Because of regional variation in the quality of water, make sure sufficient decalcifying agent is used.
- Take care when arranging the items in the dishwasher, chips and cracks occur often at this stage.
- Observe the manufacturer's advice on wash time and quantity of detergent.
- Large solid objects should be washed by hand.
- Open the dishwasher once the wash cycle is over to allow the steam to escape and prevent condensation from forming.

CARE INSTRUCTIONS FOR CUTLERY

- Wash immediately after use. If cutlery is left unwashed over a lengthy period, acids from food residue can attack the oxide layer protecting the rust-proof stainless steel.
- Similarly, the risk of tarnishing can be avoided by washing the cutlery immediately.
- Place the cutlery in the cutlery basket with the handles pointing downwards - upright and unsorted, thus enabling the water jets to access all soiled parts in optimum effect.
- Remove the cutlery immediately from the dishwasher as soon as the washing cycle is complete; items that are still damp should be wiped dry.

CARE CONSTRUCTIONS FOR DRINKING GLASSES

- To avoid breakage during the wash place the glasses so that they don't touch each other.
- Always put the glasses in the upper compartment.
- Stemmed glasses shouldn't be placed in the corners in order to let the washing liquid reach all items.
- To keep the shininess of your glasses respect the washing programs, the amount of detergents, the temperature and check the mildness of the water.
- Rather choose a short and low temperature program.
- Respect the given quantity for detergents and use a special glass agent to preserve your glasses.
- The detergents shouldn't contain any sand and should be soft to not damage the glasses.
- Fill the salt compartment regularly to milder the water and avoid limescale marks.
- Keep filter, helix and pipes clean.
- At the end of the cycle open the dishwasher during 5-10 minute to avoid marks left on the glasses by the steam.
- Hold the glasses by the bottom when putting them away to avoid finger marks.
- Glasses with gold or silver pattern as well as hand painted should be washed by hand.
