GENERAL DESCRIPTION

SILVA BLOCK is an alkaline solid designed for use as a presoak for silverware and silver table service. It also removes tarnish and stains from silver plate and sterling silver utensils. When used as directed, **SILVA BLOCK** will not harm fine and precious silver. It quickly penetrates and saturates soils for their more efficient removal in the dishwashing machine. **SILVA BLOCK** readily dissolves and produces excellent cleaning results in both hard and soft water. **SILVA BLOCK** tarnish eliminating procedure removes sulphur type tarnish and stains with an easy application in a soak solution utilizing aluminum foil. **SILVA BLOCK** is highly concentrated and can be significantly diluted for economical use.

PHYSICAL PROPERTIES

Chemical Composition..... Synthetic soil penetrating and
soil suspending agent; oxide removal agents; water conditioning agents.
Appearance..... Yellow Solid
pH of 4% Solution..... 12.0
Stability..... 1 Year @ Ambient emperature
Wetting Ability..... Excellent
Foaming..... Moderate
Solubility..... Complete and Fast

PACKAGING

147SILVABLK27: 2/7 lbs. plastic jars - 14 lbs. net/ 16 lbs. gross
