BHBA2500

Standard Features

- Compact table top design with stainless steel body and high impact ceramic glass top
 - Sloped, easy to see front panel with adjustable control for easy operation
 - Dial control knob with 9 power level settings.
 - Integral cooling fan keeps electronics cool, discharging from rear with protective air deflectors preventing hot exhaust to be pulled back into unit
 - Removable, reusable easy to clean air intake filter
 - 6' (1829mm) cord and plug supplied (60 cycle units only)
 - "Flat Design", compact high-performance electronics allow for low unit heights
 - Instant energy transmission to the pan
 - Thermostatically controlled overheat sensor shuts the unit off to prevent damage from pans cooking dry
 - Induction technology transfers heat to the pan, not to the surrounding air,
- allowing for cool operation
 - Innovated new technology for pan detection; Realtime Temperature Control System (RTCS) is an internal control software development matching speed, capability and performance.
 - Electronic output limitation continually monitors the energy transfer to the pan, helping to ensure the most efficient energy transfer possible

Specifications

Garland Induction Unit built with a robust stainless steel casting with ceran ceramic glass work top.

Compact powerful electronic system for years of reliable service.

Overheat sensors to help prevent damage to unit if pan is run dry.

Easy to operate system with rotary switch.

NOTE: Induction cooking requires use of induction-compatible cookware.

CE model BHBA2500 only complies with the latest European Norms: EN 60335-1, EN 60335-2-36, EN 62233 (EMC/EMV)

North American models: ETL listed in compliance with, CSA C22.2 No.109, NSF-4 Complies with FCC part 18, ICES-001
