Usage	Dual Use

Notes & Details

Add some style to your buffet line with this Acopa Voyage 11 qt. round stainless steel induction soup chafer with glass top, soft-close lid, and stand with fuel holder. Made of durable, stainless steel with an attractive mirror-polished finish, this chafer elevates your establishment's overall presentation. Four sturdy legs ensure stability on your tabletops, while a built-in fuel holder offers a safe place to store your chafer fuel.

This dual-purpose chafer's elegant dome cover features a clear glass window that allows guests to see what's inside without lifting the lid. The lid is also hinged so it won't become misplaced, and the soft-close feature prevents guests from slamming the lid down and causing scratches.

This chafer keeps soups, stews, dips, and sauces at perfect serving temperatures whether used with fuel or an induction heating element. When not used with fuel, it can be removed from the stand and placed on an induction heating element to provide best-in-class heat distribution with no hot or cold spots. By opting for induction heating, you'll be able to maintain a constant temperature for longer periods of time than with traditional chafing fuel.
