

AvaMix Goliath Combination Food Processor with 5 Qt. Clear Plastic Bowl, Continuous Feed, and 2 Discs - 2 hp

#928AFPC5CLR

Technical Data

Width	17 Inches
Depth	12 Inches
Height	26 1/2 Inches
Voltage	120 Volts
Bowl Capacity	5 qt.
Bowl Material	Clear Plastic
Horsepower	2 hp
Number of Blades	1 Blades
Number of Discs	2 Discs
Plug Type	NEMA 5-15P

Features

- Powerful, variable-speed 2 hp motor operates at a rate of 300 to 3,500 RPM
- S-blade easily chops, minces, and purees foods
- Easy to use with variable-speed controls and start, stop, and pulse buttons
- Clear plastic bowl and lid make it easy to monitor the processing progress
- Continuous feed attachment and discs allow for constant slicing and grating

Certifications

5-15P

ETL Listed

Technical Data

Power Type	Electric
Product Line	AvaMix Goliath
RPM	300 - 3500 RPM
Speeds	Variable
Type	Combination Processors

Notes & Details

Cut down on prep time with this AvaMix Goliath food processor! With a 2 hp motor and a speed of 300 to 3,500 RPM, this robust unit allows you to chop, puree, or mince ingredients quickly. Thanks to its 5 qt. size and S-blade assembly, it has the capacity to handle large batches and the precision to achieve the consistency you need. Plus, it includes a continuous feed attachment to prep high volumes of food with nonstop ease, helping to further increase prep speed. This attachment comes with a 1/8" slicing disc and a 1/8" grating / shredding disc, making it ideal for quickly slicing vegetables or shredding cheese.

This unit is easy to use with variable-speed controls, start / stop buttons, and an LED screen to display the RPM. Additionally, the pulse button makes processing food even faster and easier, since you can pulse until your desired consistency is achieved. It features a clear plastic bowl and lid, which makes it easy to monitor the processing progress and add ingredients when necessary. This bowl also comes with a scraper set and inner lid opening for even blending.

This unit's lid seals magnetically and the blade will automatically stop if the lid's magnet disengages. The blade will also not spin until the lid is shut and the bowl is locked in place. Its durable base protects the motor and electronic components from leaks, spills, and food debris to ensure long-lasting use. It stands on nonskid feet to keep it firmly in place during use. This food processor easily disassembles for thorough cleaning. It requires a 120V electrical connection for operation.
