Usage	Bar Blending Food and Drink Blending

Notes & Details

This AvaMix BL2T64S 64 oz. commercial blender with toggle controls delivers the power and versatility needed to reliably churn out smoothies and frozen cocktails at busy bars or restaurants. The compact base packs a powerful punch thanks to a 2 hp motor that boasts an impressive 1500W, combining with heavy-duty stainless steel blades to effectively crush ice, mix drinks, or even blend together house-made spreads and salsa!

Operation couldn't be any easier. A simple toggle switch with "High", "Low", and "Off" settings takes all of the guesswork out of your drink recipes and makes it easy for staff of all skill and experience levels to operate. When you need a quick burst of power to finish off a recipe or clear the blade area, it also has a convenient pulse switch to throttle the unit to its highest speed.

This blender comes with two 64 oz. jars, one made from BPA-free Eastman Tritan™ plastic, and another from stainless steel. Both provide maximum durability in any application, with the Tritan™ plastic jar providing the visibility needed for sight blending, and the stainless steel jar being especially useful when you need to keep hot foods hot, and cold foods cold. A 2-piece lid design lets you add ingredients to the blender at any stage in the mixing process - simply remove the clear center lid and use the included tamper to push the add-ins down into the jar. A sleek and sturdy ABS plastic base looks great on any bar counter while also making it easy to clean. For added convenience the jar pad is dishwasher safe, but the jar should be washed by hand for maximum product life. This blender requires a 120V electrical connection.
