Notes & Details

The AvaMix BX2100K 3 1/2 hp 64 oz. commercial blender combines raw power and maximum versatility to perform in a variety of establishments. Its powerful 3 1/2 hp motor makes it a true workhorse in any commercial setting, boasting a whopping 26,000 RPM and 1800W. It's the perfect multi-purpose commercial blender, ideal for everything from cocktails to spreads and dressings, and it boasts plenty of practical, useful features to keep your business running smoothly!

It uses three speed settings ranging from 15,000 to 26,000 RPM for smooth, consistent blending. When you need a quick burst of power to finish off a recipe or clear the blade area, it also has a convenient pulse button to throttle the unit on "High" speed. Plus, the easy-to-use membrane keypad features indicator lights to quickly see and set the speed of the blender.

This blender includes a 64 oz. Eastman Tritan™ jar for optimal durability. The jar allows the unit to handle frequent blending in large batches and is clear to allow for product visibility during the blending process. The 2-piece lid even makes it possible to add ingredients at any stage in the mixing process by simply removing the clear inner lid and pushing the additional ingredients down into the jar with the tamper.

The blender is made with a sleek and sturdy ABS plastic base, which looks great on any counter and holds up in commercial environments. It also includes non-skid feet to prevent any sliding around during operation. The smooth membrane keypad even eliminates ridges, making it easy to clean. A 120V electrical connection is required for operation.
