Technical Data

Capacity	64 oz.
Control Type	Digital Touchpad
Drinks (per Day)	75 or More
Features	BPA Free NSF Certified Programmable Timer
Horsepower	3 1/2 hp
Jar Type	Tritan™
Plug Type	NEMA 5-15P
Product Line	AvaMix BX
RPM	26000 RPM
Speeds	8 Speed
Type	Blenders
Usage	Bar Blending Food and Drink Blending

Notes & Details

This AvaMix BX2100P2J 64 oz. commercial blender with programmable touchpad controls and adjustable speed combines raw power and maximum versatility in a blender that is equally at home in a juice or smoothie bar, or churning out mixed drinks at a pub or restaurant! Its 3 1/2 hp motor boasts a whopping 26,000 RPM and 1800W, making it one of the most powerful blenders available in its class - and with a metal drive coupling and blade assembly, it is more than capable of handling ice crushing, drink mixing, smoothies, house-made spreads or salsa, and anything else you can throw at it.

The intuitive touchpad controls make operation simple and easy to learn. It features 8 speed settings ranging from 7,000 to 26,000 RPM, and the timer can be set in increments of 1 second up to 15 minutes. You can blend two ways, using either a time and a speed setting, or if you prefer to blend by sight simply choose a speed and let your blender work until you've reached the desired consistency. Additionally, the blender comes with 3 programmable recipe buttons that let you easily repeat your most popular items with the press of a button. You can program up to 3 timed stages in each recipe, so that speed changes happen automatically, at the right moment. Just set it up and let your blender do the rest! When you need a quick burst of power to finish off a recipe or clear the blade area, it also has a convenient pulse button to throttle the unit on "High" speed.

This blender comes with two 64 oz. jars made from BPA-free Eastman Tritan™ plastic. Both provide maximum durability in any application, and give the visibility needed for sight blending. A 2-piece lid design lets you add ingredients to the blender at any stage in the mixing process - simply remove the clear center lid and use the included tamper to push the add-ins down into the jar. A sleek and sturdy ABS plastic base looks great on any bar counter while also making it easy to clean. For added convenience the jar pad is dishwasher safe, but the jar should be washed by hand for maximum product life. This blender requires a 120V electrical connection.
