Notes & Details

The Avantco CMA1B automatic coffee maker with lower decanter warmer is the affordable and durable solution to your coffee needs! Designed for easy use with simple push button operation, this coffee brewer features a lower decanter warmer that keeps your coffee at the optimal serving temperature after brewing. Ideal for restaurants and cafes, this coffee maker is the perfect solution for your business or facility. The unit brews coffee between 190 and 200 degrees Fahrenheit for a rich, consistent product every time.

Its external stainless steel construction gives it a sleek appearance and makes it easy to clean. To ensure you can keep up with busy hours, this compact brewer can produce up to (60) 8 oz. cups of coffee per hour. This coffee maker connects to a 3/8" rear mounted water line that fills the reservoir. With independent controls for warming and brewing, you can easily set this coffee machine to fit your needs. This unit requires a 120V electrical connection for operation.
