Type	Contact Toasters
Usage	High Volume

Notes & Details

Perfect for toasting a variety of halved bread products, this Avantco compact vertical contact bun toaster allows you to quickly and easily toast delicious, fresh buns! This toaster's 2,000 watts of heating power can deliver between 750 to 3,250 toasted halves per hour. Its dual-sided design allows for bun heels and crowns to be toasted at the same time! Plus, its compact size takes up minimal space, saving up to 65% of your otherwise occupied countertop space compared to other styles of bun toasters.

To ensure your buns or bagels are evenly toasted, this unit features a 12" wide, adjustable belt with a range of different speed settings and passthrough times ranging from 9 to 40 seconds. This makes it a versatile piece of equipment for various sizes of bun heels, crowns, or pieces of bread with thicknesses between 1/2" and 1 3/8". Built for quality and longevity, this toaster features a steel griddle plate that can be thermostatically adjusted from 122 to 575 degrees Fahrenheit.

This toaster boasts a durable stainless steel construction with adjustable feet that gives this product excellent longevity. Each unit includes a single PTFE release sheet to help avoid products from sticking. For optimum machine performance and maintenance, it is highly recommended that they be installed and used with all models. With a butter roller (sold separately), this toaster could even ensure that all of buns or bagels will be quickly and consistently covered with the perfect amount of butter, saving your employees time and helping them keep up with customer demand. This unit requires a 240V electrical connection for operation.
