Avantco Equipment

Technical Data

Stainless Steel Type	Type 201
Type	Horizontal Sausage Stuffers
Usage	Standard Duty

Notes & Details

Make kielbasa, chorizo, bratwurst, and other mouthwatering meats with this Avantco SSH-11V 11 lb. horizontal manual sausage stuffer! This unit boasts a horizontal design that delivers reliable performance while keeping the stuffer stable and taking up minimal counter space. It includes 5/8", 7/8", 1 1/4", and 1 1/2" stainless steel funnels so you can make snack sticks, sausage, and luncheon meats without needing to buy any additional accessories. The four sizes of funnels allows you to use nearly infinite sizes of collagen, fibrous, and natural casings to make your special dishes.

The stuffer has enclosed steel gears that turn with two speed options so you can easily attach the handle to a fast- or slow-turning shaft, combining with a pressure relief valve to offer precise control over product consistency. The handle and gear design give you greater leverage and make turning and stuffing sausage easier than ever. The large all-metal drive gears and piston rod are made to deliver the pressure needed to stuff sausages big and small, with ultimate control and consistency thanks to the built-in pressure valve. The gasket completely seals the cylinder to prevent any meat or air leaks that would compromise the perfect sausage. Type 201 stainless steel sides and a removable type 304 stainless steel tilt-out canister ensure long-lasting durability as well as quick and simple cleaning. It also features a heavy base and large rubber feet to ensure stability while in use.
