Notes & Details

The Avantco T3300D2S double-stacked conveyor toaster is perfect for businesses with diverse toasting needs! This conveyor toaster set features a pair of T3300D conveyor toasters stacked vertically to minimize counter space and maximize production, and since it can toast up to 1600 slices of bread or bagel halves per hour, you can be sure it is ready to keep up with demand. Not only does each 10" wide conveyor belt fit 2 slices side-by-side, but its 3" opening size accommodates a variety of products. Easily toast bread, bagels, english muffins, or buns per customer request. A front guide even helps the product load safely, ensuring that each slice is pulled directly into the unit for efficient and consistent toasting.

Each toaster boasts 8 conveyor speed options, which are easy to adjust with heavy-duty control knobs. Such control allows the operator to select how long bread is toasted, determining the final coloring and crispiness. Plus, independent controls are built-in for the top and bottom elements. Each control includes settings 1 to 6 and provides the operator additional control for easy, custom toast results. And with 2 toasters you further increase your flexibility - use both units to pump out high volumes of the same product, or use each to make a different baked good!

Made of stainless steel, this toaster set features front and rear chutes that are easy to attach and remove as needed. It sits on adjustable stainless steel legs, too, making sure that the countertop below is accessible for cleaning purposes. Each horizontal conveyor toaster requires a 240V electrical connection for operation.
