Notes & Details

Serve beautifully toasted bread and bagels with the Avantco medium-duty 4-slice commercial toaster! Capable of accommodating 4 slices at a time, this durable, stainless steel unit is perfect for any breakfast bar, hotel, school, or other facility that produces a high-volume of toasted bread products.

The (4) 1 1/2" slots add outstanding versatility to the toaster so that it accepts thickly sliced bread and bagels. To alternate between the two products, just use the switchable control to indicate what you're toasting. The bagel mode browns only one side, creating a perfectly warm and half-toasted snack or breakfast menu option ready for a sweet or savory spread, like peanut butter or strawberry creme cheese (sold separately)!

To operate the toaster, twist the large, easy-to-use timer knobs after inserting the bread. For your convenience, crumbs are collected in the large, removable crumb tray to make clean-up a breeze. This commercial toaster requires a 208V electrical connection for operation.
