## Avantco Ice UC-F-210-A 26" Air-Cooled Undercounter Full Cube Ice Machine with 80 lb. Storage Bin - 222 lb., 115V

Item #194UCF210A

### Technical Data

|                           |                   |
|---------------------------|-------------------|
| Width                     | 26 Inches         |
| Depth                     | 27 Inches         |
| Height                    | 38 3/16 Inches    |
| Amps                      | 5.8 Amps          |
| Hertz                     | 60 Hz             |
| Phase                     | 1 Phase           |
| Voltage                   | 115 Volts         |
| Wattage                   | 667 Watts         |
| 24 Hour Ice Yield         | 222 Pounds        |
| Ambient Temperature Range | 40 - 90 Degrees F |

### Features

- Makes up to 222 lb. of full cube ice per day while storing up to 80 lb.
- Durable 304 stainless steel exterior with polyethylene interior
- Digital controller allows user to quickly identify issues and the current stage of production
- Bright LED lights illuminate the ice bin and removable air filter allows for quick cleaning
- R-290 refrigerant, 115V

### Certifications

3/4" Water Connection

5-15P

ETL Listed

Avantco Ice Machines

| Water Pressure Range     | 18 3/4 - 80 PSI                        |
| Water Temperature Range  | 40 - 90 Degrees F                      |

## Plan View

## Notes & Details

Make sure you've always got plenty of fresh ice on hand with the Avantco Ice 26" air cooled undercounter full cube ice machine! Capable of producing up to 222 lb. of full cube ice per day, these larger footprint undercounters are great for meeting high production and capacity needs of busy restaurants, bars or cafes. This machine also comes with an 80 lb. bin to store a larger amount of ice once its made. For ease of maintenance, a built-in diagnostic system will identify problems that your ice machine may be having and will display the issue on the digital controller so it can be repaired accordingly.

This easy-to-use controller can also be used to monitor the current stage of ice production that your machine is in. It allows you to adjust the bridge thickness up or down to maximize your harvest into individual cubes of ice, rather than full sheets. It also initiates the cleaning cycle and displays what stage of the cycle you're in.

Constructed of durable type 304 stainless steel with a polyethylene interior, this unit is built to last in the busiest commercial environments. A nickel plated evaporator and removable air filter make for quick and simple cleaning and maintenance. With 4 adjustable legs, you can level your machine on uneven surfaces and have plenty of room to clean under it. This ice machine also comes with pre-drilled holes on the back of the unit to mount your OceanLoch+ water filter to the machine to ensure you are serving the cleanest and freshest ice possible. This unit requires a 115V electrical connection for operation.
