Notes & Details

Whether you operate a pub, banquet hall, catering service, or facilitate other special events, this Avantco UDD-2-HC-S triple tap beer dispenser is an excellent way to offer crisp, refreshing draft beer to your guests without investing in a complex built-in tap system! This unit holds (1) 1/2 keg and it features a 4 tap tower with a 10 1/4" faucet height that allows you to easily fill pint glasses and pitchers with local microbrews, international macrobrews, and everything in between. The door is not only self-closing to prevent potential energy loss, but it also locks to prevent theft during off hours. This unit is equipped with knockout plugs to install external CO2 lines.

Unlike many competitive beer dispensers, this model ships with "D" system couplers. It features a sleek stainless steel exterior and a 304 type stainless steel interior that is both durable and easy to clean, while a built-in drip tray further expedites end-of-day cleaning. It has a 1/4 hp refrigeration system that circulates R-290 hydrocarbon refrigerant. R-290 refrigerant has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3, making it an energy-efficient choice for your business. A 115V electrical connection is required for operation.
