Notes & Details

Increase product visibility and appeal in the front of house with this Avantco GD4C-15-HC white four-sided glass refrigerated display case! This spacious merchandiser is an ideal fit in bakeries, diners, and other establishments that would like to show off their desserts, drinks, and other snacks while keeping them cool. The four-sided design is immediately noticeable, the white color is sleek, and the four crystal-clear glass panes provide a clear view at all angles for customers while retaining the cool air inside.

Ultra-bright LED lighting inside the cabinet further enhances product visibility. It comes equipped with three chrome wire shelves, which increase versatility in how you organize the contents of the merchandiser.

The GD4C-15-HC comes equipped with easy-to-use digital controls, which help to ensure precise temperature control between the case's temperature range of 32 to 53 degrees Fahrenheit. The bottom-mounted compressor allows easy access for cleaning and maintenance, and since hot air rises, it draws air from the coolest part of the kitchen for better running conditions. The compressor circulates R290 refrigerant, which has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3. This unit requires a 115V electrical connection for operation.
