Notes & Details

Display, merchandise, and serve a delicious variety of ice cream flavors with this Avantco ADC-12-HC ice cream dipping cabinet! Holding up to 12 ice cream tubs at a time, the unit is perfect for ice cream shops, candy stores, dessert bars, and cafeterias. The frozen storage space beneath the display even provides a convenient place for holding up to 10 back-up flavors, making it a space-efficient unit for businesses with limited space.

A sliding cover protects the ice cream while helping to retain cold air around the product for a safe holding environment. Because it slides open and closed, it's fast and easy to use, too, which is perfect for those busy rush hours or constant streams of customers in the summer months! The cover comes equipped with a lid lock to ensure that your ice cream remains protected and temperature controlled. The cover is also crystal clear, allowing for a clear view of your tempting frozen treats.

Featuring a manual control to maintain temperatures from -15 to 10 degrees Fahrenheit, this cabinet ensures that ice cream is held in a proper environment to preserve its quality and consistency. To help achieve this, the robust, bottom-mounted compressor Uses R-290 refrigerant. This specialized refrigerant has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3. Plus, for maximum structural rigidity and temperature retention, the cabinet is foamed-in place using polyurethane insulation.

This unit is white painted steel and built with rounded corners for an attractive, sleek appearance. It requires a 115V electrical connection for operation.
