Intertek

Technical Data

Voltage	115 Volts
Cabinet Type	Merchandising
Capacity	14 cu. ft.
Casters	With Casters
Color	White
Compressor Location	Bottom Mounted
Container Display Capacity	8 Cans
Container Storage Capacity	6 Cans
Door Style	Sliding
Door Type	Glass
Features	Customizable
Front Style	Curved
Horsepower	2/5 hp
Plug Type	NEMA 5-15P
Refrigerant Type	R-290
Temperature Range	-15 - 10 Degrees F
Total BTU	1092 BTU
Total Container Capacity	14 Cans
Type	Dipping Cabinets

Notes & Details

Display, merchandise, and serve a delicious variety of ice cream flavors with this Avantco curved glass ice cream dipping cabinet! Holding up to 8 ice cream tubs at a time, the unit is perfect for ice cream shops, candy stores, dessert bars, and cafeterias. The frozen storage space beneath the display even provides a convenient place for holding up to 6 backup flavors, making it a space-efficient unit for businesses with limited space.

Outfitted with a curved-front sneeze guard, the dipping cabinet is perfect for front-of-house applications. Not only does the sneeze guard prevent customers from contaminating the product, but it ensures crystal-clear visibility for merchandising purposes. By showcasing bright and fruity or dark and decadent chocolatey flavors behind the glass, you tempt customers into trying a bite! A sliding cover also protects the ice cream while helping to retain cold air around the product for a safe holding environment.

This unit is white-painted steel and built with rounded corners for an attractive, sleek appearance. Because it slides open and closed, it's fast and easy to use, too, which is perfect for those busy rush hours or constant streams of customers in the summer months! The cover also comes equipped with a lid lock to ensure that your ice cream remains protected and temperature controlled. It also comes with custom vinyl.

Featuring a manual control to maintain temperatures from -15 to 10 degrees Fahrenheit, this cabinet ensures that ice cream is held in a proper environment to preserve its quality and consistency. To help achieve this, the robust, bottom-mounted 2/5 hp compressor uses R-290 refrigerant. This specialized refrigerant has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3. Plus, for maximum structural rigidity and temperature retention, the cabinet is foamed in place using polyurethane insulation. It requires a 115V electrical connection for operation.
