Notes & Details

Display, merchandise, and serve a delicious variety of ice cream flavors with this Avantco ADC-8-N ice cream dipping cabinet! Holding up to (8) 10" x 10" 3-gallon ice cream tubs (sold separately) at a time, the unit is perfect for ice cream shops, candy stores, dessert bars, and cafeterias. The frozen storage space beneath the display even provides a convenient place for holding up to 6 backup flavors, making it a space-efficient unit for businesses with limited space. This cabinet features a white curved front design with a painted steel construction.

A sliding cover protects the ice cream while helping to retain cold air around the product for a safe holding environment. Because it slides open and closed, it's fast and easy to use as well, making it ideal for busy periods. The cover also comes equipped with a lid lock to ensure that your ice cream remains protected and temperature controlled. Featuring a manual control to maintain temperatures from -15 to 10 degrees Fahrenheit, this cabinet ensures that ice cream is held in a proper environment to preserve its quality and consistency. To help achieve this, the robust, bottom-mounted compressor uses R-290 refrigerant. This specialized refrigerant has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3.

A convenient frozen storage space underneath the display accommodates up to 6 ice cream tubs, providing easy access and helping to save valuable storage space. This cabinet is made fully mobile with 4 included casters, making it easy to move out of the way when cleaning. The tub baskets are easy to remove and store.
