Notes & Details

Introduce high-volume frying to your poolside or concession stands with this Backyard Pro 35 - 40 lb. single tank portable outdoor fryer. Holding up to two fry baskets, the 90,000 BTUs of power enable you to cook up 65 lb. of frozen french fries per hour. The frying well can hold between 35 and 40 lb. of oil. This outdoor fryer uses a standard 30 lb. propane tank (sold separately) for quick heat up times and fast recovery, while the thermostatic control lets you adjust the temperatures between 200 and 400 degrees Fahrenheit.

Built on 4 casters, 2 of which are locking, this fryer can maneuver around easily, making it the perfect choice for catering, party rentals, or even moving it around a resort venue! A handle on the front of the unit will offer more control over steering and includes a frypot cover. The exterior is made with 304 stainless steel which is both durable and rust-resistant. The interior is made with a combination of galvanized steel and 304 stainless steel to ensure this fryer can endure the rigorous demands of daily use.

Store service plates, ready to cook product, or condiments with the convenient stainless steel shelf mounted on the side of the unit. Underneath the shelf is a small hook for hanging tools nearby. Above the frying vat is a thin bar, which is designed to hold idle baskets for drainage. The elevated wall around the well adds an extra layer of safety for the user when frying. This outdoor, portable fryer will ensure you can serve freshly fried food anywhere!
