Notes & Details

This 21" tall Backyard Pro patio stove / range brings your stockpot full of steamed vegetables or deep fried turkey to a comfortable working height for delicious results every time! Its powerful 55,000 BTU burner quickly and evenly heats the contents of your pot or pan and is equally at home deep frying fish, boiling mouth-watering corn-on-the-cob, or whipping up a delicious gumbo or stew.

Its heavy-duty welded steel frame is stable and sturdy enough to support an oversize pot or cast iron skillet to make it easier to prepare larger quantities of food with ease. The burner is protected all the way around by a wind screen for an added measure of safety, and a 5 PSI adjustable regulator and 36" rubber hose are included to connect this outdoor range to your liquid propane tank.
