Notes & Details

Whether you're making sweet and spicy snack sticks or savory black pepper jerky, this Backyard Pro Butcher Series JS-15A 1 1/2 lb. jerky shooter will have you pumping out both with the simple squeeze of a trigger! With 4 stainless steel nozzles, both round for snack sticks, and flat for jerky, there's no need to use separate tools for different styles. Just simply place your meat mixture into the tube and pull the trigger so that the plunger compresses and pushes the meat through the nozzle.

The tube is 15" in length and can hold up to 1 1/2 lb. It is made of durable aluminum that is food grade and non-corrosive. A cleaning brush is included for thorough cleaning of the tube after each use. This shooter has a heavy duty drive and handle, as well as a stainless steel rod with heavy plastic piston.
