

Backyard Pro Courtyard Series 10' x 15' Red Straight Leg Heavy-Duty Aluminum Instant Pop-Up Canopy Tent

#554ALP10X15R

Technical Data

Length	10 Feet
Width	15 Feet
Maximum Height	106 - 118 Inches
Color	Red
Features	UV-Resistant
Frame Material	Aluminum
Material	80% Polyester / 20% PVC
Shape	Rectangle
Style	Straight Leg
Type	Canopies

Features

- Provides up to 150 sq. ft. of shelter for patrons, employees, and equipment
- Strong premium 300D fabric canopy composed of 80% polyester and 20% PVC
- Durable yet light weight aluminum frame with PU coating is corrosion-resistant
- Offers superior weather and flame resistance (CPAI-84) for long-lasting use
- Heavy-duty, professional-grade design is ideal for long-term events, such as fair and festivals

Notes & Details

This Backyard Pro AL Series instant pop-up canopy tent offers premium durability and coverage with a light weight, portable design, making it easy to work your next event in style and comfort! Its heavy-duty, professional-grade design is ideal for long-term events, such as high-end corporate events, large-scale festivals and food fairs where open flames are common, and for businesses needing long-term, heavy-duty use. The top fits snugly over the frame for a seamless look and easy setup.

Designed for durability, longevity, and safety, the strong, premium 300D fabric canopy is composed of 80% polyester and 20% PVC, offering superior weather resistance and shape retention for reliable protection. Its water-resistant fabric protects your guests, equipment, and employees during light to moderate rain. For added safety and security, it's also fire-resistant (CPAI-84) and features a UV-resistant coating with color fastness to guard against harmful UV rays. Perfect for outdoor events, it provides up to 150 sq. ft. of shade beneath the 10' x 15' canopy. The corrosion-resistant, powder-coated aluminum frame and eye-catching red canopy top combine to ensure longevity and optimum visibility, near or far.

This AL Series canopy features a rising truss ceiling system that combines the benefits of the full truss system's strength with reinforced truss bars, offering additional headroom similar to a cathedral-style frame. The aluminum frame with PU coating is light weight yet as strong as comparable steel frames, allowing for easy transport and a sturdy setup. Plus, the 4-legged design ensures stability and safety for staff and guests alike. It comes with a roller bag to ensure that you have an easy way to store and transport the canopy frame, and the included stake and rope kit provides a means of securing the canopy to the ground without worry.

For added convenience, this canopy is simple to set up; it only takes a few minutes with the work of two employees to complete! Set the frame on its feet. Begin pulling the legs out while still keeping the top of the frame at an easily reachable level. Once the frame is partly expanded, add the cover on top with each corner fitting over a leg. Continue to pull the legs in opposite directions until they're out as far as they will go and lock into place. Finally, raise the height of each leg by lifting the upper portion, stopping when each leg locks into place. Tear down is just as easy. Remove the top, adjust the legs back to their lowest height, disengage each corner's locking button, and gently push together until the frame is once again folded fully.
