Notes & Details

Extend your patio seating season or warm up outdoor dining with this Backyard Pro PH1SS stainless steel portable propane outdoor patio heater! This mushroom-style patio heater is great for your deck, patio, poolside bar, or outdoor event. With its sleek, round design and reflector, this patio heater provides added warmth to your outdoor dining area, hotel patio, or hospitality space.

This freestanding patio heater can be easily moved from place to place as needed, or moved into storage during the off season or to protect it from bad weather. Since it is powered by a portable liquid propane tank (sold separately), it is not tethered to an electrical power cord or a gas line so you can use it in just about any outdoor hospitality area.

By using a patio heater in your business, you can extend your outdoor seating season by several weeks! When you have that extra seating capacity, you can allow your customers to enjoy your outdoor spaces longer.

Made of durable type 201 stainless steel, this patio heater is designed to stand up to frequent transportation and use outdoors at your restaurant. When you simply need a little extra warmth and a stylish accent piece, this patio heater is a great choice. Plus, it can warm an area up to 20' in diameter. This model requires a liquid propane connection for operation and has an output of 47,000 BTU.
