ETL Listed
Intertek

Technical Data

Plug Type	NEMA 5-15P
Power Type	Electric
Shape	Round
Type	Waffle Cone Makers
Waffle Type	Cone

Notes & Details

This Carnival King WCM2 double waffle cone maker is the perfect addition to any kitchen serving ice creams, frozen yogurt, and gelato. Its (2) 8" diameter non-stick grids provide ample space to make waffle cones and prevent them from sticking to the inside of the machine. This waffle cone maker produces 80 waffle cones per hour, so you have peace of mind knowing you can serve all of your hungry customers. Plus, with cool-touch, Bakelite handles, you can easily open the unit when the waffle cones are done cooking without concern of accidental burns.

The 5 minute timers on the unit feature an audible "ding" when waffle cones are done cooking, reducing the chances of burning around the edges. A green light shines when the waffle cone maker is on, and an orange heating light lets you know when the unit is heating to the right temperature. This waffle cone maker has (2) adjustable thermostats from 120 to 570 degrees Fahrenheit. For best results, the recommended time and temperature setting is 400 degrees Fahrenheit for 1.5 - 1.75 minutes. This waffle cone maker requires (2) 120V electrical connection and has an output of 2200W.
