Certified by NSF

Stackable

Dishwasher Safe

Technical Data

Insulation Material	Polyurethane
Material	Polyethylene
Product Line	CaterGator

Notes & Details

Designed for reliable transport and service, the CaterGator 10 gallon black insulated beverage dispenser makes it easy to serve a large number of guests hot or cold beverages. This 10 gallon capacity holds up to (182) 7 oz. servings or (80) 16 oz. servings, making it ideal for large buffets, hotels, and convention centers. It features a dripless faucet for mess-free dispensing, keeping the beverage station dry and free from puddles. The faucet has a spring action design, which is combined with an o-ring seal to prevent unwanted leaks during service and transport. Plus, the bottom of the faucet measures 4 1/8" from the base of the unit to create clearance for various types of cups and glasses up to 4" tall. This makes it easy to serve everything from hot coffee in mugs to fresh lemonade in tumblers or plastic cold cups.

Because of the dispenser's superior temperature retention, it maintains hot or cold beverage temperatures for up to 7 hours. For use with cold drinks, pre-chill the unit by filling 1/3 of the container with icy water. Cover and let it stand for 30 minutes, then dispose of the water and replace with cold beverage. For use with hot drinks, fill a third of the container with hot water and cover for 30 minutes. Dispose of the water and fill with the hot beverage of your choice.

This insulated beverage dispenser features a rugged, polyethylene exterior and withstands constant wear and tear from use, transport, and exposure to high heat. It also includes extra wide plastic latches that are mounted with steel plates for additional reinforcement and longevity. For convenient transport, the dispenser features molded-in handles that are both durable and ergonomic. This design allows the dispenser to stack with similar Carlisle and Cambro servers and simplify storage.

As an added bonus, the dispenser includes 8 drink identification labels, which help guests easily identify the contents of the beverage server. The set includes 6 pre-printed labels for popular beverages and 2 blank labels for unique drink concoctions!
