Type	Combo Kits Food Pan Carriers

Notes & Details

Perfect for catering and take-out operations, this CaterGator black front loading insulated food pan carrier with Vigor plastic food pans and seal lids delivers the durability and the stability your food needs to arrive intact and at the proper temperature. This set includes a food pan carrier along with five full size 2 1/2" deep food pans and five seal lids. Made of durable polyethylene and insulated with polyurethane foam insulation, this carrier helps maintain the proper temperature prior to delivery, keeping hot food hot or cold food cold for up to 7 hours. For use with cold dishes, pre-chill the unit with its door open in a walk-in refrigerator or freezer. For pre-heating the unit, place a hotel pan of hot water into the unit, and close the door for 20 minutes prior to loading your hot dishes. It includes plastic latches that securely lock the door to retain temperature. It also includes steel reinforced plate hinges to resist breakage and to ensure longevity. The door even swings open a full 270 degrees for easy access. For convenient transport, the unit features molded-in handles that are both durable and ergonomic. This design allows the carrier to stack with similar Carlisle and Cambro carriers and simplify storage.

The included 2 1/2" deep pans can be used to prep, store, transport, and serve food items. The polycarbonate material is virtually unbreakable and resistant to food acids and oils, helping to extend the life of these food pans. They can also withstand temperatures ranging from -40 to 212 degrees Fahrenheit so they can be used in various storage locations. They are also freezer-safe. Thanks to the clear material, these food pans offers optimum visibility for quick product identification. The reinforced top and bottom corners are also resistant to bending, cracking, and denting. Included capacity indicators allow you to quickly and easily do inventory management and measure out how much you need of any product. A spoonable bottom makes removing contents easier, reducing food waste. These pans even include stacking lugs so that you can keep all of them together and maximize your storage space. This kit includes compatible polyethylene lids to eliminate the risk of contaminants. The unique seal of these lids protects against spills, and the durable polyethylene construction withstands repeated kitchen and catering use with the ability to withstand temperatures between -40 and 18- degrees Fahrenheit. Perfect for transporting foods to offsite locations, these lids are BPA-free and keep food fresher longer.

Set Includes:

- (1) CaterGator black front loading insulated food pan carrier
- (5) Vigor full size 2 1/2" deep clear polycarbonate food pans
- (5) Vigor full size gray secure sealing polyethylene food pan covers
