Notes & Details

Perfect for catering events, trust this CaterGator insulated pan carrier kit with three top load carriers and dolly to help you transport your signature dishes safely to and from events. This set includes 3 top loading food pan carriers, 1 red compact dolly, and 1 strap to secure the pan carriers. The carriers feature a top loading design for ease of loading, allowing you to simply place pans directly down into the carrier and lift them out upon delivery. They hold up to (1) 8" deep full size food pan to accommodate any of your signature dishes. They will work with most types of pans as well, including foil, plastic, and even stainless steel. The versatile design of these pan carriers allows you to mix and match a number of pan combinations to best suit your needs, including (3) 2 1/2" deep, (2) 4" deep, and (1) 6" deep and (1) 2 1/2" deep pans, making this carrier a go-to choice for any application.

Because these carriers are made with expanded polypropylene (EPP), they offer superior temperature retention and maintains hot or cold food temperatures for up to 4 hours. If you need a longer hold time, you can use the CaterGator Dash hot board or CaterGator Dash ice board (sold separately) to extend your food holding time even further. These insulated pan carriers feature a professional grade construction made from expanded polypropylene (EPP), an insulated material with a high level of durability. This high-tech material is extremely lightweight and offers excellent impact, water, and chemical resistance. Not only a durable and lightweight option, these top load carriers are an eco-friendly choice for your business as they can be used again and again. They include molded-in handles for easy transportation that are both convenient and ergonomic. This design allows the carriers to stack with each other to simplify storage.

Quickly and safely transport these 3 pan carriers with the included compact dolly. This dolly can transport up to 550 lb. of stacked food pan carriers. Its sturdy, light weight, shock-resistant ABS frame and high-quality polypropylene wheels are built to last. 2 fixed casters and 2 swivel casters provide ultimate control over even and uneven surfaces with ease. This dolly comes with a removable EPP insert with 4 holes to match up with the base of the EPP unit front loaders (sold separately). The holes create a snug fit that won't shift while you're pushing and transporting the carrier. Also, they make stacking 2 units on top of one another more secure. The EPP insert can be removed to accommodate larger food pan carriers.

Delivering quality products at a fair price, CaterGator is the ideal serving solution for catering businesses, hotels, food trucks, and concession stands. Upgrade your catering services with this insulated food pan carrier!
