Cooking Performance Group FEC-100-B Single Deck Standard Depth Full Size Electric Convection Oven - 208V, 1 Phase, 11 kW

Notes & Details

Perfect for virtually all cooking and baking applications, this Cooking Performance Group FEC-100-B single deck full size electric convection oven is an invaluable asset to any commercial kitchen. It features a temperature range of 150 to 500 degrees Fahrenheit and is powered by a 11 kW heater and built-in convection fan. The fan circulates the heat throughout the cooking chamber for even distribution. The fan is also adjustable between 2 modes, cook and cool down, and 2 speeds, high and low. This gives you control over the oven's functioning so that it's always operating in the best manner for your tried-and-true or experimental recipes!

The interior of the oven is made with porcelain sides and floor for easy cleaning. It also includes 3 adjustable wire racks, which can be moved into 11 different positions to best suit your menu. Two independent glass doors feature Bakelite handles to provide comfortable heat resistance and to provide visibility while closed. This gives you the ability to check on dishes without releasing hot air and reducing the chamber temperature. This particular oven requires a 208V electrical connection for operation.
