Cooking Performance Group FECD-100-C Single Deck Standard Depth Full Size Electric Convection Oven- 208V, 3 Phase, 11 kW

Notes & Details

This Cooking Performance Group single deck standard depth full size electric convection oven is an invaluable asset to any commercial kitchen. Perfect for virtually all cooking and baking applications, this oven provides the versatility your business needs. From a hearty lasagna to a delicate souffle, the oven can handle a wide menu of items to keep up with customer demands. Its dual-speed fan, adjustable racks, and generous temperature range all make it a must-have in professional food service. Additionally, this convection oven features a digital display panel to display the cooking temperature and time to reduce guesswork.

This oven features a temperature range of 150 to 500 degrees Fahrenheit and is powered by an 11 kW heater and a built-in convection fan. This makes the oven great for countless menus and food service operations. This unit allows you to switch the built-in convection fan between 2 modes, cool and cook, and 2 speeds, high and low. This gives you control over the oven's functioning so that it's always operating in the best manner for your tried-and-true or experimental recipes. A built-in timer gives you precise measures for your bake times to ensure that every product is cooked to perfection.

For long-lasting durability and easy cleaning, the exterior is constructed of sturdy stainless steel, while the interior of the oven is made with porcelain sides and floor. It includes 3 adjustable wire racks, which can be moved into 11 different positions to best suit your menu, and it has 4 adjustable legs. It features high-efficiency heating elements and an electronic thermostat for accurate temperatures and precise cooking. Two independent glass doors feature Bakelite handles to provide comfortable heat resistance and visibility while closed. This gives you the ability to check on dishes without releasing hot air and reducing the chamber temperature. This oven requires a 208V, 3 phase electrical connection for operation.
