

351ICCPG38M

Cooking Performance Group ICCPG-38M Countertop Induction Range with Probe Cooking - 208-240V, 3800W

Item #: 351ICCPG38M Qty: _____

Project: _____

Approval: _____ Date: _____

Features

- 30 power levels and a 90 to 450 degrees Fahrenheit temperature range
- Features probe cooking for set temperatures and improved control
- SCHOTT CERAN® ceramic glass cooking top construction with stainless steel housing and feet
- Induction cooking provides safer alternative to open flames
- 208-240V, 3800W

Technical Data

Width	13 3/8 Inches
Depth	17 1/8 Inches
Height	3 15/16 Inches
Cord Length	23 5/8 Inches
Power Cord Length	4 15/16 Feet
Probe Length	7 13/16 Inches
Maximum Pan Diameter	10 1/4 Inches
Minimum Pan Diameter	4 3/4 Inches
Amps	15.83 Amps
Voltage	208 - 240 Volts

Certifications

 FCC Compliant

 6-20P

 ETL Listed
Intertek

Cooking Performance Group ICCPG-38M
Countertop Induction Range with Probe
Cooking - 208-240V, 3800W

Technical Data

Wattage	3800 Watts
Color	Silver
Control Type	Dial Digital
Features	Rapid Boil Button SCHOTT CERAN® Ceramic Glass
Included	1 Probes
Installation Type	Countertop
Material	Glass Stainless Steel
Number of Burners	Single
Number of Power Levels	30
Plug Type	NEMA 6-20P
Power Type	Electric
Sensor Type	Type-J
Suggested Weight Capacity	130 lb.
Temperature Range	90 - 450 Degrees F
Type	Induction Ranges
Usage	Medium Duty

Cooking Performance Group ICCPG-38M Countertop Induction Range with Probe Cooking - 208-240V, 3800W

Notes & Details

Add a convenient extra burner to your cooking station with this Cooking Performance Group countertop induction range. It's the perfect addition to back-of-house supplemental cooking and confectionary areas or front-of-house made-to-order stations and display cooking. This unit comes with a probe for probe core cooking, allowing you to cook or hold more delicate foods like stocks or sauces at a set temperature for improved control. By cooking with both power and temperature, your chefs can improve accuracy and cook foods more gently. Additionally, this can help prevent boil over to avoid messes and save time from having to restart a dish.

This unit is powered by both a digital and knob control, featuring 30 power levels and a temperature range of 90 to 450 degrees Fahrenheit. Both the probe and the unit's power display on the screen for easy use and control. This unit also features a rapid boil button to help speed up your cooking process, and it has two cooling fans and an aluminum mesh filter. This induction cooker is compatible with induction-ready pans that have a bottom diameter between 4 3/4" and 10 1/4". The cooking surface is constructed of German SCHOTT CERAN® ceramic glass, and the stainless steel housing and feet make this unit exceptionally durable while also easy to clean.

With its induction technology, this countertop range generates heat with no open flame. This means less ambient heat in your kitchen, fast heat-up times, and most importantly no open flame or flammable fuels that could be a potential safety hazard. This unit boasts 3800W of cooking power and requires 208-240V of electrical power for operation.
