Handle Type	None
Mounting Style	Wall Mounted
Spout Type	Swing
Temperature Rating	180 Degrees F

Technical Data	
Thread Type	NPT
Type	Wok Fillers
Water Inlet Size	1/2 Inches

Notes & Details

This Emperor's Select wall-mounted wok range faucet lets you fill woks with water quickly and keep on cooking your menu favorites! This faucet features a 12" long spout that activates the water flow when you swing it out, and shuts the water off when you fold it back against the wok range so you can keep cooking. Additionally, this foldable design ensures that the faucet stays out of the way and is less likely to get damaged by fast-paced cooking, which is especially useful if it will be installed directly above the cooking area on a wok range. A 2 GPM aerator fills woks fast with minimal splashing, and the wall-mounted design is easy to install, with a 1/2" NPT inlet.
