Notes & Details

The Estella SM20 28 lb. spiral dough mixer will handle a range of dough products at your bakery, pizzeria, or restaurant. Designed with commercial applications in mind, this dough mixer has a durable 20 qt. stainless steel bowl, and it can handle a flour capacity of 2.2-17.6 lb. and a dough capacity of 28 lb. Whether you're prepping pizzas or bread, you'll notice a notable uptick in your kitchen efficiency once you install this unit in your establishment.

This spiral dough mixer has an intuitive control panel that includes a timer, which will keep careful track of how long the mixer churns and prevent the dough from becoming overworked. As a built-in precaution, the mixer has an auto-stop failsafe that will turn off the unit once the timer hits zero, which is helpful for when employees are preoccupied with other tasks throughout the kitchen. The Estella SM20 28 lb. mixer also features a steel grated lid that allows for ingredients such as flour to be added to the dough as it is mixing without having to shut it off. The grate also keeps employees from sticking their hands in the bowl when the mixer is on, improving safety.

This unit's 2-speed, belt-driven motor, which has a power output of 1,500W, will handle a strenuous workload while yielding impressive results. The hooks and bowls can operate at 2 different speeds: the hooks run at low (112 RPM) and high (198 RPM), while the bowl operates at low (15 RPM) and high (20 RPM). A sturdy base will keep the mixer in place while handling the rigors of commercial establishments. This unit requires a 120V electrical connection for operation.
