- Holder has hooked handles that attach to the pail

Notes & Details

Safely and easily store and transport fryer oil with this Fryclone oil filtration kit with 6.5 gallon orange utility oil pail, filter cones, and filter holder. Perfect for filtering, collecting, and moving oil when it has reached the end of its usable life, this set includes (50) 10" fryer oil filter cones, a 10" chrome-plated filter holder, and a 6.5 gallon orange pail. The pail is constructed of a durable galvanized metal with a food-safe interior coating, and it has a 6.5 gallon capacity that allows you to empty up to 45 lb. of oil from fryers. For user safety, the body features a heat-resistant tilting handle and a helper handle on the side, ensuring that pouring is smooth and safe. Plus, its lid is equipped with four quick locking clips, so spilling won't be an issue.

The filter cones are made from a 70 micron non-woven material with over-locking stitches for added strength, and they fit into the included chrome-plated filter cone holder. Additionally, the holder has hooked handles that will easily attach to the pail. Regularly filtering your fryer oil with this set will help prolong the oil's life by removing contaminants that can cause off tastes and oxidation. With this set, your fryer oil is sure to last longer and taste great!

Kit Includes:

- (50) 10" fryer oil filter cones
- 10" chrome-plated filter holder
- 6.5 gallon orange utility oil pail
