Notes & Details

This Fryclone XL filter bag holder frame is a great way to make sure that your deep fryer's oil is always clean, and free of debris chunks that can degrade its quality over time. Simply attach a compatible bag to the frame, and you're ready to begin filtering. It features a versatile design that can be used as a skimmer or you can place it over an oil pail and pour directly over the bag. The all-metal construction makes it easy to clean when you're done, too, while rubber components on the grip and end hooks provide added comfort and protection.
