

Fryclone 40 - 50 lb. Fryer Oil Shuttle

Item #259TRANSPA

Technical Data

Width	10 7/16 Inches
Depth	10 15/16 Inches
Height	48 1/8 Inches
Capacity	40 - 50 lb.
Handle	With Handle
Material	Steel
Type	Disposal Caddies Oil Shuttles

Notes & Details

Safely transfer oil from your fryer to your oil collection container with the Fryclone 40 - 50 lb. fryer oil shuttle. This steel transport unit fits under most fryer drain valves including a drain attachment. It not only reduces the risk of spillage, it eliminates the need for an open pot, which is both dangerous and difficult to handle. By using the shuttle, employees are kept safe, and thanks to the shuttle's wheels, less strain is placed on the employee during oil transport. These wheels, which measure 8" in diameter, feature a solid rubber tread for excellent grip and traction.

If using the shuttle with warm oil, the heat-resistant handles and welded hand shield help prevent burn injuries. To prevent oil from spilling during transport, its lid fits securely. A maximum fill line is even formed into the body of the shuttle and is visible when the lid is open, giving the user a visual cue as to when the shuttle has been filled to capacity.

Features

- Helps safely transport between 40 and 50 lb. of used oil and reduces spills
- Fits properly under most fryer drains including drain attachment, reducing spillage
- Heat-resistant handles and shield minimize risk of burns if moving warm oil
- Lid fits securely to prevent oil from spilling during transport
- 8" wheels allow for more ergonomic operation to reduce strain on the user
