Notes & Details

Enhance quality while saving time and effort with this Garde cast aluminum butter spreader. Designed to hold up to 1.25 lb. (1,200 mL) of butter, this unit allows you to spread melted butter on your bread, bagels, or English muffins with ease. Its durable cast aluminum construction is built to withstand high-volume use, ensuring that it will remain a reliable and efficient tool in your establishment for years to come.

This spreader can be placed directly on a flat-top griddle to keep your butter melted and allow you to quickly spread butter while cooking. This spreader requires a low butter minimum for use, which helps reduce waste and keep costs down. It also catches excess butter so it can be used again. This unit fully disassembles for thorough cleaning and sanitation. Sure to promote a clean workspace while enhancing workflow efficiency and reducing waste, this spreader is perfect for any restaurant, cafe, or bakery.
