Type	Can Opening Stations

Notes & Details

This Garde CANSTN72 half size mobile aluminum can rack for #10 and #5 cans with a stainless steel top and a heavy-duty Garde #10 American-made can opener is an ideal choice for restaurants, hospitals, retirement communities, schools, and other food service businesses that need to store large numbers of food cans! Designed to hold up to (72) #10 cans or (95) #5 cans, this unit can be loaded from the front or the rear so your staff can utilize a first in, first out system for stock rotation.

Made of all-welded, 1 1/2" aluminum tubing, this can rack is built to take a beating in your commercial or institutional environment. Additionally, it features angled can guides that allow cans to roll to the front of the unit for easy access. This can rack ships assembled so that you can immediately start using it to organize your storage space and it comes with a stainless steel top that can be used as an extra shelf or work space.

This can rack also comes with a Garde heavy-duty can opener with a stainless steel base mounted on the top of the can rack. Since the can opener is mounted right where your cans are stored, your employees won't need to transport cans around the prep area in order to open them. The can opener may be easily removed from its base for cleaning, and the unit's knife and gear are also removable for better sanitation.
