

GOOSEBUSTER® PRO

DETER GEESE WITH NATURALLY RECORDED SOUNDS

The GooseBuster® PRO is a one-of-a-kind system that was developed using decades of scientific research involving the behaviors and vocal communications of Canada geese. The scientifically proven GooseBuster® broadcasts authentic Canada goose sounds through four state-of-the-art speakers; the alert call lets geese know there is potential for trouble and the alarm call signifies immediate danger. The GooseBuster® is programmed to constantly change duration and sound combinations, making geese feel under threat and evacuate the area without identifying the source.

A single speaker version is ideal for smaller applications.

Pests: Geese, ducks

Applications: golf courses, ponds, parks, schools, hospital grounds, resorts, cemeteries, condominium complexes, large estates, other areas with large congregations of geese

4-speaker

Single speaker

Specifications

Coverage	up to 7 acres (GooseBuster®), up to 1.5 acres (GooseBuster® PRO)
Power Requirements	1 amp 110 or 220vAC adaptor, or 12vDC
Dimensions	Control Unit 9" x 9" x 5.25", Four speakers 10" x 8" x 5" (GooseBuster®) Control Unit 6" x 6" x 3.5", Speaker 5.5" x 5.5" x 5" (GooseBuster® PRO)
Weight	16 lbs. (GooseBuster®), 4 lbs. (GooseBuster® PRO)
Speakers	8 ohms, 30 watts
Frequency	500 – 1,500 Hz
Compliance	Supply power source is UL and CE listed. EPA Est. 075310-OR-001.
SKU	GB, GB-1
Origin	Assembled in the USA
